Adjusted to avoid duplications arising from fact that production credit associations and banks for cooperatives borrow from and rediscount loans with Federal intermediate credit banks.
 Includes outstanding loans of associations placed in liquidation.
 Excludes advances in connection with CCC Programs.

Source of tables 466 and 469: Department of Agriculture, Farm Credit Administration; Annual Report, and records.

Exclusive of interbank loans.
 Net amount after deducting impairment or deficit.
 Adjusted for debentures held by banks of issue and by other Federal intermediate credit banks.
 Total is less than sum of figures for individual banks because of interbank transactions.

# No. 472.—Bank Clearings for Leading Cities: 1929 to 1946

(In millions of deliars. Cities listed in order of importance according to clearings in 1946. No figures given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 473) are a better measure of volume of payment. For figures for earlier years for all ottes reporting to New York Clearing House Association,

#### No. 476 .- FIRE LOSSES, TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES: 1876 TO 1945

[Amounts, except per capita, in thousands of dollars. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$255,378,000) which over all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter]

# No. 479 .- LIFE INSURANCE OF FRATERNAL ORDERS IN THE UNITED STATES

[Although number of orders reporting varies considerably, most of larger orders report regularly, so that figures are fairly comparable from year to year. Prior to 1920 figures for number of orders as given below include all known to be in existence whether reporting or not]

[Money figures in millions and tenths of millions of dollars]

Source: The Spectator, Philadelphia, Pa.; Insurance Yearbook, Casualty and Surety Volume.

<sup>1</sup> Number reporting beginning 1920.
2 Total premium receipts prior to 1910.
3 Figures for 1895 to 1930 include adjustment expenses excluded thereafter.
4 Including taxes.
5 Figures through 1930 include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables.
Figures for 1935 to 1935 relate to casualty, surety and miscellaneous insurance companies only.
4 Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyds; number of companies and income and disbursement items also include accident and health departments of life insurance companies. No companies after 1943.

1 Long-term partially tax-exempt. Average yields on taxable bonds due or callable in 15 years and over are as follows: 1942, 2.46; 1943, 2.47; 1944, 2.48; 1945, 2.37; 1946, 2.19.

2 High-grade non-callable, including public utility and industrial.

3 Average of monthly figures computed by dividing the aggregate annual dividends being paid as of the end of each month by the market value of all outstanding shares of the companies as of the same date.

4 Includes 15 banks and 10 insurance stocks.

5 Average of figures for June to December.

Adjusted for stock dividends and splits but not for changes in share capitalization due to other causes. Source: Moody's Investors' Service, New York, N. Y.

#### No. 492.—Profits and Dividends of Industrial Corporations: 1939 to 1946

[Includes data for 629 large corporations none with assets of less than \$250,000. Representation very limited for companies with assets between \$250,000 and \$5,000,000. Excludes data for some important nondurable goods industries, such as ment packing, sugar refning, and rubber. Net profits are before dividends and after all charges, such as depreciation, interest, special reserves charged as expenses, and all taxes. Few companies report aggregate dollar dividends quarterly; for most companies represented, dividends are computed for each class of stock on basis of dividends per share and number of shares outstanding. Dala not available helper 1939. For net profits of all corporations as compiled from income-tax, see tables 361 and 362, pages 345 and 346]

[In millions of dollars]

<sup>2</sup> Includes marketable securities other than U. S. Government.

<sup>3</sup> For 1942-1945 includes provisions for renegotiation other than those combined with income tax liabilities.

Source: Securities and Exchange Commission; release No. 762, Working Capital of U. S. Corporations.

Class 1 line-nau rainoads, covering about 80 percent of air rainoad operations.
 Class A and B electric utilities, covering about 95 percent of all electric power operations.
 30 large companies, covering about 85 percent of all telephone operations. Series excludes American Telephone and Telegraph Company, the greater part of whose income consists of dividends received on stock holdings in the 30 companies.

#### No. 495.—Capital Issues—Summary, by Classes: 1923 to 1946

[In millions of dollars. Data cover domestic and foreign issues in United States. Preferred stocks of no par value and all common stocks are taken at offering price, other issues at par, except that in figures for corporate issues for 1917 and 1918 all stocks are included at market value. Corporate issues for 1917 and 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than \$100,000. State and municipal issues include bonds issued by States, Tarritories, and possessions, countles and municipalities, and by school and road districts and other independent governmental bodies]

## No. 498.—Industrial and Commercial Failures—Number and Liabilities: 1857 to 1946

[Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1839, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

No. 499.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1941 to 1946

[Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

# 17. Communication Systems

# (Including postal service)

Financial and operating data for telephone, wire-telegraph, ocean-cable, and radiotelegraph carriers which render domestic and foreign service, are shown in this section. Also included are data relating to radio broadcast stations and networks which operate in the continental United States and its possessions.

Additional statistics on the communication industry as well as statistics on the number of telephones on farms, radios in occupied dwelling units, and the manufacture

of communication equipment appear in other sections of this Abstract.

The Bureau of the Census in the Census of Electrical Industries compiled at 5-year intervals beginning in 1902 a report on telephones and telegraphs, covering all systems and lines. The last survey made was for the year 1937. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been centralized and expanded in that agency.

Reports filed with the Federal Communications Commission cover substantially all of the radio broadcast stations and networks, wire-telegraph, ocean-cable, and radio-telegraph carriers operating in the United States and its possessions. Gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States and its possessions. Statistical data compiled from these reports are contained in a volume entitled Statistics of the Communications Industry in the United States, which is published annually by the Federal Communications Commission.

"Bell System," as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries, which comprise all operating telephone carriers having assets in excess of \$1,000,000 and in which the American Telephone & Telegraph Co. owns, directly or indirectly, more than 50 percent of the outstanding voting capital stock.

Data on the postal service, obtained principally from the annual reports of the Postmaster General, are also included in the section.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Telephones and Telegraphs. Survey discontinued.

<sup>&</sup>lt;sup>1</sup> Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.
<sup>3</sup> Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines; 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and \$1,000,000 investment in

equipment.
Not reported for systems and lines having less than \$5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.

Not reported except for systems and lines with income of \$5,000 or more.
 Including assessments of mutual companies, and miscellaneous operating revenues.
 \$3,378,000 miles of wire in cable and 6,193,000 not in cable.
 No data.

No comparable data available.

# No. 508.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1945

[Covers class A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose average annual operating revenues exceeded \$100,000. Gross operating revenues of class A carriers (excluding intercompany duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. (See table 503.) Figures include data for carriers consolidated and merged for which annual data are available. Includes intercompany duplications, but data for 1942-45 excluding such duplications are shown in italies below]

#### No. 509.—RADIOTELEPHONES—SUMMARY: 1937

[Covers all companies and systems licensed by United States to engage in reception and transmission of commercial radiotelephone communications. Excludes radiotelephone stations such as amateur, experimental, Federal, police, fire, etc., which were not licensed to charge fees for receiving or sending calls. Survey covered U. S. licensees in United States, Alaska, Hawaii, and Puerto Rico, as well as those operating ship stations]

Number of companies or systems Number of stations (as of Dec. 31) Operating revenues applicable to the radio link (dollars). Revenue calls, total number. Foreign traffic of the U. S. (calls subject to overseas regulations). Ship traffic of the U. S. (calls subject to overseas, coastal, and harbor regulations). Other traffic—Within the United States; ? within Alaska; ? within Hawali; ? within Puerto Rico;?	182 1, 212, 073 147, 596 1 52, 507 1 26, 409
Other traffic—Within the United States; 2 within Alaska; 2 within Hawaii; 2 within Puerto Rico; 3 Hawaii and Puerto Rico with other countries except continental U. S. and Alaska with ships.	

Calls originating, terminating, or relayed in United States.
 Originating calls only.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Telephones and Telegraphs. Survey discontinued.

<sup>:</sup> Ratio of operating expenses to operating revenues.

The decrease reflected in data shown for 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.

Data for 1926 through 1932 include estimates.

In comparing figures in this table, consideration should be given to the minor effect of revisions of Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1957, resulting in certain changes in and rearrangements of both balance sheet and income statement.

Excluding interrompany duplications.

#### No. 510.--Wire-Telegraph Carriers (Land Line and Ocean Cable)--Summary: 1926 TO 1945

[All money figures in thousands of deliars. Figures show development of principal carriers filing annual reports with F. C. O. Includes carriers consolidated or merged for which annual report data are available. Includes intercompany duplications

<sup>In comparing data for 1940-45 with prior years, consideration should be given to changes in reporting requirements due to the uniform system of accounts effective Jan. 1, 1940.
Ratio of operating expenses to operating revenues.
Beginning 1940, figures are before deduction of income taxes.
Includes \$400,000 charged to surplus arising from reduction of capital stock.
Includes \$100,000 and \$394,000 charged to capital surplus during years 1940 and 1944, respectively.
Includes \$100,000 and \$394,000 charged to capital surplus during years 1940 and 1944, respectively.</sup> 

Source: Federal Communications Commission; annual report, Statistics of the Communications Industry in the  $U,\,S,\,$ 

<sup>&</sup>lt;sup>1</sup> Ratio of operating expenses to operating revenue.

<sup>2</sup> Represents estimates by reporting carriers. Excludes stock and commercial news traffic and telephone toll messages. Mobile and foreign messages, domestic haul, excluded to avoid duplication.

<sup>3</sup> Data for 1926-33 include estimates by reporting carriers.

<sup>4</sup> Deficit or other reverse item.

<sup>5</sup> Includes not book cost of plant of Postal Telegraph, Inc., acquired by The Western Union Telegraph Co. in amount of \$16,754,000 on basis of gross book cost of \$50,320,000 less tentative allowance for depreciation of \$52,565,000.

<sup>6</sup> Represents operating income before deduction of income taxes.

<sup>7</sup> Not comparable with amount reported for Dec. 31, 1943, because of accounting adjustment for Postal Telegraph plant purchased by the Western Union Telegraph Co. Oct. 7, 1943; comparable 1943 amount is \$477,431,000.

<sup>8</sup> Includes \$3,536,000 charged to capital surplus.

Source: Post Office Department, Annual Report of the Postmaster General.

<sup>1</sup> Excluding rural free delivery routes, ocean mail routes, and air-mail routes to foreign countries.
3 Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.
4 International includes foreign countries on domestic basis. For explanation, see headnots, table 517.
5 Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.
5 Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.
5 From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.
7 From Sept. 1, 1869, to June 30, 1870. International money orders first issued under act onvention of Oct. 12, 1867.
6 Gross revenues of department for 1918 and 1919 include \$44.500,000 and \$71,292,000, respectively, war-tax revenue accruing from increased postage.

#### No. 517.—POSTAL MONEY-ORDER BUSINESS-SUMMARY: YEARS ENDED JUNE 30. 1920 to 1945

[For revenues from money orders, see table 516. For value of orders issued for other years, see table 515. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between United States and its outlying possessions, on one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between United States and "domestic basis" foreign countries, and these are not included in "Domestic"]

# No. 519.—Transportation of Domestic Mails, by Class of Service: 1925 to 1945

[Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mall space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates based on "regular authorizations"]

#### 18. Power

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these between 15 and 20 percent of the coal, over 2 percent of the oil, practically all of the water, and 10 percent of the natural gas are converted to electricity for application to the energy requirements of our economic system.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the Minerals Yearbook. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Summaries of statistical material from these sources appear in this Abstract in section 27. Mining and Mineral Products.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes; and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as Electric Power Statistics. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its Statistical Bulletins. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. For the period 1999 to 1946, data on the use of electric power by major industry groups were compiled and published by the Federal Power Commission in a report on Industrial Electric Energy. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this Abstract.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 534.

The Bureau of the Census in the Census of Electrical Industries compiled at fiveyear intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 530.

Data in this section relate to continental United States except as indicated.

#### No. 528.—Energy from Mineral Fuels and Water Power—Annual Supply: 1889 то 1945

In trillions of British thermal units. Unit heat values employed are: Anthracite, 13,600 B. t. u. per poundibituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 6,000,000 B. t. u. per barrel; natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent of manufacturers and mines and of 40 percent for public utilities]

490 POWER

FIGURE H.—INSTALLED CAPACITY OF ELECTRIC UTILITY GENERATING PLANES IN THE United States: 1889 to 1946

Source: Federal Power Commission.

#### O. 525.—Production of Electric Energy and Capacity of Generating Plants BY TYPE OF PRIME MOVER: 1920 TO 1946

[Figures for 1945 in tables 524-528 for Electric Utilities (for public use) are based on operation of 3,886 power plants owned by 1,594 concerns. Production and capacity of plants owned by following classes of electric utility operators are included—privately owned electric utilities, municipal electric utilities, Federal power projects, cooperatives, power districts, State projects, and publicly owned noncentral stations. Electric utility data for 1920-44 have been revised to 1945 basis which excludes stationary plants of railways and railroads and also incidental supply by mining and manufacturing plants, all previously included. Industrial classification comprises production and capacity of 4,158 industrial electric power plants of 100 kilowatts and over in 1945 including amounts for stationary electric power plants of railroads and railways eliminated from Electric Utility series as noted above. Installed capacity as of Dec. 31 except 1946 (Dec. 1)

#### No. 530.—Electric Light and Power Industry—Summary: 1902 to 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Statistics do not include establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Government or by States were not included unless energy was sold commercially]

electric operating service.

Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

If addition, hogged fuel, sawmill, and other waste were reported.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Electric Light and Power Industry. Survey discontinued.

¹ The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number or such stations operated under the same ownership. ¹ Not available. ¹ Comprises 1,112 stations operated by steam; 1,233 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover). ⁴ Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated." ⁴ Includes "Estimated value of free service." ⁴ Number on June 30. ¹ Reported by commercial establishments only. No data for municipal establishments. ⁴ Not comparable with figures for other years since amount includes only salaries and wages chargeable to electric overating service.

### No. 584.—Water Power—Developed, 1920 to 1945, and Estimated Undeveloped, January 1947

In thousands of kilowatts. Developed water power for 1945 and prior years represent rated kilowatt capacity of electric generators operated by actual installations of water wheels and turbines. Amounts prior to 1939 include generator capacities of electric utility plants only (see headnote, table 525) as generator capacities of industrial plants not generally available. 1939 and 1945 industrial figures not directly comparable; in many instances appear to be in close agreement. Water wheel and turbine capacity of industrial and miscellaneous plants, expressed in horsepower, and including mechanical drive plants (of 396,000 horsepower in 1939) not having electric generators were: 1921, 1,726,578; 1925, 1,750,323; 1930, 1,665,332; 1935, 1,929,404; 1939, 2,122,228]

No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

Not available.

Source: Federal Works Agency, Public Roads Administration; annual statements on status of highways and State-highway finance.

Not available.
 Includes mileage not classified by type.
 Low type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, block and dual-type surfaces, and unclassified surfacing on bridges.
 Includes funds transferred to or from local units. Data for D. C. not included prior to 1940. Beginning 1940, includes proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes.

No. 537.—Existing Rural Road Mileage, by Type and by Governmental Control, by States, End of 1944

[Rural roads include roads outside incorporated areas and certain more populous unincorporated areas. State highway mileage data are from State reports for calendar year 1944. Other mileage data are from State and planning survey reports for calendar year 1943 or 1944, except for a few States for which latest available data are for earlier years]

Source: Federal Works Agency, Public Roads Administration; annual statements on status of highways.

<sup>&</sup>lt;sup>1</sup> Low type includes soil-surfaced, gravel or stone, and low-type bituminous; high type includes high-type bituminous, Portland cement concrete, brick, block, and dual-type surfaces.

<sup>1</sup> Mileages shown are in addition to those forming a part of State highway systems or included with local road mileages reported.

<sup>2</sup> Total includes 58,427 miles, not classified by type, for the following States: Calif., 20; Ind., 888; Minn., 57,168; Utah, 274; Va., 77.

<sup>3</sup> Includes 3,425 miles of State park, forest, and reservation roads.

<sup>4</sup> Estimated from 1945 data submitted by State. Approximately 2,200 miles of national forest highways, recorded heretofore as roads under Federal control, are now shown as part of the local system.

#### No. 588.—Disbursements of State-Highway Funds, by States: 1921 to 1945

[Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenence, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1835 covers calendar years; figures for earlier years for many States represent fiscal years. Beginning with 1940, figures not comparable with those for prior years as they include data for certain State income applicable to highways, namely, proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes. These data not included in prior years]

<sup>&</sup>lt;sup>1</sup> A substantial part of the trucks reported comprises chassis without body; hence value of bodies for these chassis not included. Includes military trucks; total sales for the period Sept. 1, 1939 through 1945 amounted to 2,557,000 valued at \$5,238,234,000. Production for the period Jan. 1, 1939 through 1945 was 2,607,000.

<sup>2</sup> Road tractors excluded prior to 1924.

<sup>3</sup> Less than 500.

### No. 548.-Motor Trucks and Truck Tractors-Production: 1936 to 1945

[Duta cover production of trusks for military and civilian use. Jeeps, military ambulances, and wheel-drive personnel carriers are included; half-tracks and armored cars are excluded. Military classification includes those procured by Army, Navy, Akreaft Recourses Control Office, Canada, and Treasury for military use; civilian classification includes those produced for civilian use under W. P. B. Limitation Orders. Data have been converted from "rated tonnage capacity" to "gross vehicle weight"]

No. 545 .- MOTOR-VEHICLE REGISTRATIONS (COMBINED FIGURES FOR PASSENGER CARS AND MOTOR TRUCKS), BY STATES: 1915 TO 1945

[Calendar year periods: that is, registration periods ending not earlier than Nov. 30 and not later than Jan. 31.

Figures represent net numbers where possible, excluding reregistrations and nonresident registrations. Excludes, in most cases, official cars exempt (or partially exempt) from paying regular registration fees to States. For some States, includes trailer registrations. Beginning 1925, includes tractor trucks and tractors for highway use]

[In thousands]

# No. 547.—Commercial Motor Vehicles, by Vehicle Type, by States—Number as of Dec. 31, 1941

[The Nation-wide Truck and Bus Inventory covers 97.4 percent of all bus registrations and 92.4 percent of registrations of other commercial vehicles. Buses are defined as passenger-carrying vehicles of 9 persons or more. Excludes station wagons, sedan deliveries, fire engines, ambulances, hearses, small trailers of less than 3,000-pound capacity such as are pulled behind passenger cars, and converted passenger cars]

<sup>1</sup> Includes District of Columbia. All States were in registration system in 1933 and thereafter.

Source: Federal Security Agency, U. S. Public Health Service, National Office of Vital Statistics as of July 16, 1946. Formerly Department of Commerce, Bureau of the Census; basic figures are published in annual reports as follows: 1915-36, Mortality Statistics; 1937-45, Vital Statistics of the United States, Pt. I. Motor-vehicle registrations, Federal Works Agency, Public Roads Administration; annual statements on motor-vehicle registrations.

Not available.
 Based on enumerated population, Apr. 1, 1940.

# 20. Transportation, Air and Land—Steam and Electric Railways, Express Companies, Motor Busses, and Civil Aeronautics

Steam railways.—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The Statistics of Railways in the United States, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalisation, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Electric railways.—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual Transit Fact Book. The Bureau of the Census has published a quinquennial report on electric railways from 1902 to 1937. In the more recent years the report also covered affiliated trolley-bus and motor bus operations. The Census of Electrical Industries was not taken for 1942.

Motor carriers.—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual, quarterly, and monthly reports submitted to it by these carriers. This series begins with 1939 data.

The annual review and statistical number of Bus Transportation, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—The Civil Aeronautics Administration of the Department of Commerce compiles statistics on civil aviation. These data now appear in the Statistical Handbook of Civil Aviation, an annual publication of the Civil Aeronautics Administration, first issued in 1944.

### No. 556.—STEAM RAILWAYS—MILEAGE OWNED AND MILEAGE OPERATED: 1890

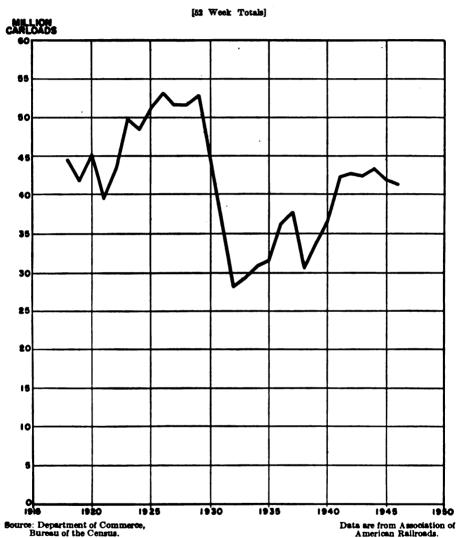

[Excludes switching and terminal roads beginning with 1910 (they operate about 2,300 miles of main tracks).

First and second columns cover all railways, including "ci reular" and "unofficial" lines; last 5 columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies]

## No. 559.—Steam Railways (Class I)—Equipment Installed and Retired: 1918 to 1945

["Installed" includes new and used equipment purchased; equipment leased from others; the return to service of equipment that was leased to others; equipment rebuilt or converted; and units (except locomotives, since 1925) transferred from one class of service to another. "Retired" includes equipment permanently withdrawn from transportation service; equipment leased to others; return of leased equipment to owning companies; equipment rebuilt or converted; and units (except locomotives, since 1925) transferred from one class of service to another]

#### No. 560.—Steam Railways (All Reporting Companies)—Equipment in Service: 1928 TO 1945

"All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. Excludes the large number of cars owned by private car lines]

# No. 566.—Steam Railways—Stock Outstanding, Dividends, and Interest: 1891 to 1945

[For years ended June 30 prior to 1916, calendar years thereafter. Includes nonoperating as well as operating roads. Excludes switching and terminal roads beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes unimportant class III roads. Amount of stock shown in first column is exclusive of stock held by issuing company, but includes that held by other railway companies

<sup>&</sup>lt;sup>1</sup> Figures for 1924 include investment of leased lines and exclude investment of proprietary companies not rendering annual reports. The investment in road and equipment of proprietary companies included in 1945 is \$806.153.000. No allowance for cash and material and supplies, and no deduction for depreciation.

<sup>2</sup> Excludes returns for lessor companies.

<sup>3</sup> Excludes returns for class III and class III companies.

No. 569.—Steam-Railway Freight Service—Train-Miles, Car-Miles, Tonnage AND RELATED AVERAGES: 1891 TO 1945

[For years ended June 30, prior to 1916, thereafter calendar years. Excludes switching and terminal roads beginning with 1908, except as noted. Tonnage "per loaded car" for "All roads" based on revenue tonnage only; and for "Class I roads" on revenue and nonrevenue tonnage. Tons are of 2,000 pounds]

Source: Association of American Railroads, Car Service Division, Washington, D. C.; annual summary, Cars of Revenue Freight Loaded. Weekly reports are published currently.

No. 577.—Steam Railways—Revenue Freight Originated and Carried, by Commodity Groups, All Roads, 1906 to 1915, Class I Roads, 1916 to 1945

[In thousands of tons of 2,000 pounds. For years ended June 30 prior to 1916, calendar years thereafter. Excludes switching and terminal roads beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing grand total about 6 percent. Excludes nonrevenue freight; this is a large item in the case of a few commodities notably coal]

Includes some undistributed freight. Fixeluding class III.
 Data for selected classes omitted, pursuant to order of Commission, Apr. 27, 1942.
 Including receipts from connecting lines.

### No. 578.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED. BY STATUS: 1891 TO 1945

[For various reasons, including the fact that returns were required under different acts, the statistics are not strictly or various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage for fallway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1908-10 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody]

#### No. 588.—Electric Railways—Summary: 1890 to 1937

The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals through 1937 beginning with the inquiry for 1902, covers (i) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads in-cluded are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table do not include data for motorbus and trolley-bus oper-ations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see source)]

ITEM	1890	1902	1912	1922	1927	1932	1 1937
Number of companies	789 5, 783	987 16, 645	1, 260 30, 438			2 706 20, 110	1 478 14, 214
Miles of all track operated 1	8, 123	22, 577	41,065			31, 548	23, 770

<sup>&</sup>lt;sup>1</sup> Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,000 car-miles; 1,042,866 car-hours; \$2,368,295, operating revenue; and \$2,412,010, operating expense.

<sup>2</sup> Includes certain companies in Pennyslvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included

through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

\* Includes small mileage of track lying outside United States.

\* Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

\* Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept.

16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

\* Includes 324 trolley-bus operators.

\* Includes 29,721,000 trolley-bus passengers.

\* Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,822,000 for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years. excluded so far as possible for earlier years.

<sup>1</sup> Amortization represents a very small part of this total.
<sup>2</sup> Does not include Federal or State income taxes.
<sup>3</sup> Withdrawals of sole proprietors and partners.
<sup>4</sup> Based on 643 carriers in 1940.

Does not include drivers of equipment engaged by these carriers to perform "purchased transportation."

Includes collection and delivery employees as follows: 1942, 19,010, compensation, \$34,862,000; 1943, 21, compensation, \$44,02,000; 1944, 21,111, compensation, \$48,778,000.

Based on 934 carriers.

Based on 1,019 carriers.

73

B AFBURY BAUGHI ABOARE ESU

Based on 1,019 carriers.
 Includes duplications on account of tonnage received from connecting motor carriers.
 Figures for 1940 are based on 606 carriers; they do not include carriers which reported expense for "purch transportation" in excess of 5 percent of total "operation and maintenance" expenses.
 Basic figures include expenses of operating vehicles in intercity and local services; these expenses are separable. Comparisons of revenue and expense per intercity vehicle-mile are therefore subject to qualifical

<sup>1</sup> Local passenger revenue and baggage, mail, express, newspaper, miscellaneous station and terminal, and other

Source: Interstate Commerce Commission; annual report, Statistics of Class I Motor Carriers.

Local passenger revenue and baggage, mail, express, newspaper, miscellaneous station and terminal, and other operating revenue.
 Amortization a very small part of this total.
 Excludes Federal or State income taxes.
 Withdrawals, small in amount, of sole proprietors and partners.
 Total vehicles owned at close of year.
 Includes bus-miles of vehicles operated under "purchased transportation arrangements."
 Data reported by 134 carriers in 1940.
 Includes only service on local and suburban runs of preponderantly intercity carriers.
 Averages for regular route intercity service and for owned vehicles only in 1940; for owned and leased vehicles thereafter.

Source: Department of Commerce, Civil Aeronautics Administration; Progress of Civil Aeronautics i United States. 1936 to 1942, published in Civil Aeronautics Journal, Jan. 15, 1944; data on civil aviation i U. S. for 1943–46, Statistical Handbook of Civil Aviation.

Domestic, international, and territorfal; see note 4.
 Domestic.
 Not available.
 Domestic air carriers operate within continental limits of United States; international and territorial of tions cover activities of American air carriers in foreign countries and territories of United States.
 Beginning with 1940, excludes data for following affiliated companies of Pan American Airways Sy Cia Mexicana de Aviacion, S. A., Cia Nacional Cubana de Aviacion, and Panair do Brasil, included in prior;
 Includes operation and office personnel, and beginning with 1940, stewards and stewardesses.
 Includes 3 infants in arms and 2 company employees.
 All data, except airplane-miles flown, as of Dec. 31.
 Long line teletypewriter equipped.

No. 598.—AIRPORTS, BY CLASS AND BY TYPE, BY STATES: JAN. 1, 1947

<sup>&</sup>lt;sup>1</sup> Class I airports are for private owners of smaller type aircraft; class II, private owners of larger type aircraft and feeder transport aircraft; class III, present day transport aircraft; class IV and V, largest aircraft now in use and those planned for immediate future.

<sup>3</sup> Indicates airports which exist but do not come up to class I standards.

<sup>3</sup> Includes Army, Navy, Army operated and Navy operated (latter two are municipal or commercial airports temporarily taken over by Army or Navy), C. A. P., miscellaneous Government and private.

Source: Department of Commerce, Civil Aeronautics Administration; published quarterly in Civil Aeronautics Journal.

## 21. Waterways, Water Traffic, and Shipping

Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, Bureau of Census, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, from Jan. 1, 1935, through Dec. 31, 1939, Virgin Islands; from United States Maritime Commission and War Shipping Administration, continental United States. Beginning with 1946, data on water-borne foreign commerce will be compiled by Bureau of Census.

Units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity

of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigaoccupied by the propering machinery, fuel, crew quarters, master's cabin, and naviga-tion spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

No. 594.—Water-Borne Commerce of the United States—Cargo Tonnage, Foreign and Domestic: 1940 to 1945

Comprises the following with figures for 1945: Harbor traffic of New York, Philadelphia, and San Francisco.

Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and Detroit River.
 Estimated from figures in this table on assumption that all deductions represent duplications in domestic

Source: War Department, United States Army, Office of the Chief of Engineers; Annual Report, Part II.

traffic; includes some minor duplications in figures for foreign traffic.

 <sup>2.173,000</sup> tons; local traffic of other scaports, 38,479,000; domestic traffic of lake ports, 14,023,000.
 Excluding St. Marys Falls Canal traffic (112,983,000 tons in 1945) and additional Detroit River traffic (16,533,000 tons in 1945), data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

### No. 595.—Commerce of Principal United States Ocean Ports: 1945

[In thousands of short tons of 2,000 pounds. In addition to commerce here shown, many ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, for New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic]

See also table 599.

See also table 599.

Figures are for Intercoastal Waterway, St. Marks River, Fla., to Corpus Christi, Tex., through 1942.

Actual traffic through Detroit River amounted to 127,045,000 in 1945, of which 16,533,000 tons represent traffic of ports on Detroit River. Remainder was through traffic including that of St. Marys Falls Canal.

See also table 598.

[Dend weight tennage in themsunds. Covers vessels of 1,000 gross tous and over emanged in foreign and domestic trade, and inactive vessels. Excindes special types and vessels employed on Great Lakes. Data as of June 30, except 1946 (as of Sept. 30)] No. 601.—American Flag Steam and Motor Merchant Vessels: 1935 to 1946

Salling vessels, barges, soows, dredges, and canal boats.
 Decrease of tonnage arises principally from registered tonnage having been corrected in 1818, 1829, and 1830 by omitting all vessels with registers granted prior to 1818, which were presumed to have been lost at sea, captured,

etc.

Including Puerto Rico and Virgin Islands.

Including Hawaii and Alaska.

Includes tolls on local tolls-paying vessels; adjusted for overcharges and undercollections.

Taxes, fees, fines, etc. Principally from operation of shops and docks.

After deduction of canal earnings repaid to appropriations. Italics denote deficit.

No interest charge against the Canal is actually made by the Treasury. In order to present the net results of operation of the Canal, interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1920, is included in capital investment

account.

Includes adjustment of \$15,000 in postal surplus.

Includes adjustment of \$44,000 in postal surplus.

No. 621.—VESSELS ENTERED AND CLEARED AT SEAFORTS IN FOREIGN TRADS— NET REGISTERED TONNAGE, BY NATIONALITY OF VESSEL: 1921 TO 1944

[In thousands of net tens. Includes only traffic by sea and to and from foreign countries. The large trade with Canada on the Great Lakes and the St. Lawrence is handled about equally by vessels of the United States and of the British (Canadian) flag. See tables 618 and 619 in which the columns for northern border represent trade with Quebec and Ontario]

Total by sear   Entered.   22, 526   23, 328   19, 63   10, 302   17, 701   13, 149   22, 226   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102   24, 102		سندند بالمراجع		1

### 22. Irrigation and Drainage

#### [Data in this section relate to Continental United States]

#### No. 622.—IRRIGATION ENTERPRISES—SUMMARY: 1910 to 1940

[Data are for the 17 Western States and Arkansas and Louisiana. Tables 622 to 631 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment and includes works for supplying water and land for which water is supplied, except that cost and value of land is not included in capital invested"]

Carl Inc. Carl	CENSUS OF-

<sup>&</sup>lt;sup>1</sup> Excludes irrigated fallow land or land in irrigated crops that failed.

Source: Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Irrigation of Agricultural Lands.

Represents redeterminations and therefore differs from figures shown for earlier years.
 Not available.
 Relates to total area in enterprises; irrigable areas not reported.
 Excludes cost of operation and maintenance for rice-growing districts in Gulf States; consequently figure is not comparable with those for later years.

No. 624.—Irrigation Enterprises—Area Irrigated, 1919, 1929, and 1939, and Area Irrigation Works Were Capable of Supplying With Water, 1930 and 1940, by States and by Principal Drainage Basins

Based on acreage works were capable of supplying with water.
 Based on acreage assessed by enterprises serving 5 units or more.
 Relates to enterprises reporting no irrigation in 1939 but having works capable of supplying water in 1940.

<sup>A farm reporting both irrigated and nonirrigated crops is recorded as one farm in total.
Not available.
Includes data for Lespedeza hay not shown separately.
Data available only for Arizona and California.
Computed by using acreages grown alone in all States except California, Idaho, Oregon, and Washington, where total acreages were used.
Running square bales of lint cotton, counting round as half bales.</sup>

Excludes 51,658 acres of temporarily suspended lands with crop value of \$1,415,570.
 Area for which the Bureau is prepared to supply water.
 Additional lands in Sacramento and San Joaquin Valleys received indirect benefits during 1945.
 Private projects reconstructed with Government funds.
 Water conservation and utilization projects.

Warren Act contracts are those which provide for sale of excess water to irrigation districts, i. e., water over and above project requirements. Lands served are usually located outside project proper. The act also provides for joint construction and financing of irrigation works by Federal Government and irrigation districts. ○ ¹ Totals for all crops represent net areas after deducting areas subsequently used for other crops or pasture; detail is total area in cultivation, no deductions being made for duplicated areas. ○ ¹ Bales of 800 pounds each. ○ ⁴ Payments received from Federal and commercial agencies.

#### No. 640.—Drainage on Farms and Drainage Enterprises—Summary: 1920, 1930, AND 1940

[Statistics for drainage on farms in first part of this table were collected from individual farmers, while those for drainage enterprises were obtained from a special canvass of organized drainage enterprises. A farm may have artificial drainage without being included in any organized enterprise; conversely, an organized enterprise may include a farm on which there is no artificial drainage, because the enterprise facilitates removal of water from that farm. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. Enterprises may include timbered and other unimproved land not yet in farms. Data as to drainage on farms were not collected in the census of 1940. Canvass of drainage enterprises did not include New England States, N. Y. N. J., or Pa.; Del. and Md. were included only in 1940; no enterprises were found in Ala. or W. Va. before 1940, and none in Va. in 1920]

<sup>1</sup> Before tabulation, acreage assessed was reduced by amount of overlapping with enterprises organized subse-

quently.

3 Sum of acreages assessed, without deduction for overlapping.

3 In addition to amount invested, an estimated \$3,968,000, or six-tenths of 1 percent, was reported as required to complete works already begun or authorized.

Source of tables 640 and 641: Department of Commerce, Bureau of the Census; Fifteenth and Sixteenth Census Reports, Drainage of Agricultural Lands.

### 23. Agriculture—General Statistics

Statistics on agriculture are for the most part prepared by the Bureau of the Census, Department of Commerce, which conducts the Census of Agriculture and by the Department of Agriculture which prepares current estimates.

Beginning with 1840 a Census of Agriculture has been taken every 10 years in conjunction with the Decennial Census of Population. In 1925, 1935, and 1945 a middecennial Census of Agriculture has also been taken. Information at each census has been obtained by a personal canvass of individual farms by census enumerators. The first Census of Agriculture, however, was limited in scope. It included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry, the value of products of the dairy, and the production of the principal crops. The number of farms and the acreage and value of farm land were first included in the Census of 1850. In 1880 information was first secured as to the tenure under which the farms were operated. A detailed classification of farm land according to use was first obtained in 1925; in earlier censuses, farm land was classified only as improved land, woodland, and other unimproved land.

A farm as defined by the Bureau of the Census is all the land on which some agricultural operations are performed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. A tract of less than 3 acres is not considered a farm unless its agricultural products for the year covered were valued at \$250 or more. Agricultural operations consist of the production of crops or plants, vines or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, fur farms, mushroom cellars, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus for a plantation each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator was not included under land in farms. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Annual agricultural statistics of a wide variety have been issued currently by the United States Department of Agriculture for over 80 years—the first being as of May 1, 1863. There are now 41 field offices—1 in practically every State—which act as clearinghouses for information furnished by voluntary reporters. Information from the field offices is sent to Washington where reports covering State and national data are issued by the Crop Reporting Board of the Bureau of Agricultural Economics.

Statistics compiled by the Bureau of Agricultural Economics on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-quarters of a million reporters, located in every agricultural county in the United States, who report on one or more items during a year. These reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, rental value of farm homes, as well as each receipts from farm marketings.

These general notes on agriculture apply also to section 24, Agriculture—Production and Related Subjects, which covers farm crops, foodstuffs, farm animals, animal products, and related subjects.

No. 642.—Population, Farms, and Farm Property-Summary: 1850 to 1945

[Figures for 1850 relate to June 1, for 1910 to Apr. 15, for 1920, 1935, and 1945 to Jan. 1, and for 1930 and 1940 to Apr. 1, except that classification of land according to use refers to preceding year. Leaders indicate no data available]

<sup>!</sup> Estimates

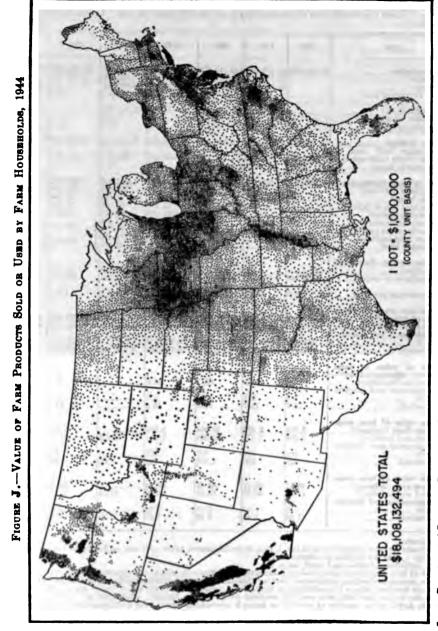

Estimate for total population as of Jan. 1, 1945, including armed forces overseas; estimates for urban and rural

Estimate for total population as of Jan. 1, 1945, including armed forces overseas; estimates for urban and rural as of July 1, 1945, for civilian population only.
For definition of urban and rural, see p. 2.
4 1930-45 farm population comprises all persons living on farms regardless of occupation, except that 1945 figures exclude persons in dwelling units rented to other than farm operators; 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside limits of any incorporated place. Further difference is due to fact that 1920, 1935, and 1945 censuses were taken in January, while 1930 and 1940 censuses were taken in April, when number of persons on farms is appreciably larger. For additional farm population data, see tables 13 and 15, pp. 15 and 17.
5 Land used only for pasture that had been plowed within 7 years.
6 Pasture other than cropland and woodland.

Pasture other than cropland and woodland.
 Cropland harvested, crop failure, cropland idle or fallow, and plowable pasture.
 "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

Value is of specified farm property, not all farm property.
Value is of specified farm property, not all farm property.
19 1945 figure represents value of horses, mules, cattle, hogs, sheep, goats, and chickens; in addition to these items, 1940 figure includes value of poultry other than chickens, bees, and fur animals in captivity. For 1940 figures comparable with 1945, see table 645, p. 587. For items and age groups included for earlier years, see 1940 Census of Agriculture Reports, Vol. III; for figures comparable to 1945, see 1945 Census of Agriculture Reports,

<sup>&</sup>lt;sup>1</sup> Differences between these totals and totals for farms regardless of additional land owned do not represent data for operating owners who owned additional land. Some operators did not make a report as to this item. For 1930, operators who did not report as to this item are included with those operators who reported that they owned no additional land.

After farm expenditures.

#### No. 675.—FARMS-NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1940 AND 1945

[For 1940, farms were classified by type on basis of major (single largest) source of income in 1939. For 1945 (value refers to calendar year 1944), farms with value of products used by farm houshold exceeding total value of all farm products sold were classified as subsistence farms. All others were classified by type of product representing more than 50 percent of total sales, the farm was classified as "General"]

<sup>&</sup>lt;sup>1</sup> Exclusive of housework. Inquiry for 1939 and for 1944 specifically excluded contract construction work. No mention was made of wages for this kind of work for 1929.
<sup>2</sup> Not available.

Inquiry specified expenditures for automobiles, tractors, and motortrucks for 1929 and 1939, and trailers for 1939.

Includes quantities for which the farm operator reported no expenditure or expenditure for freight only.

Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing materials, etc.

### No. 684.—Fertilizer Consumption, 1880 to 1945, and by States, 1942 to 1945

[In thousands of tens of 2,000 pounds. Based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tomage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ended June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons. In addition to tonnage for consumption, fertilizers and fertilizer materials produced in continental U. 8. are exported to island possessions]

<sup>1</sup> See note 2, table 686. 2 See note 3, table 686.

Represents marketing season during which farm products of a specified year are moved into channels of trade.
 Marketing seasons overlap.
 For years since about 1935, comprises members, contract members, and shareholders, but excludes patrons not in these categories.
 Represents value of commodities for which associations render essential services in marketing or purchasing and value of commodities sold by associations on commission or brokerage basis, also some intra-association

### 24. Agriculture—Production and Related Subjects

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture.

The most extensive of the current survey data are gathered by the Bureau of Agricultural Economics from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Bureau of Agricultural Economics, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census. Usually, all known sources of information pertaining to agriculture in general, from the farm to the consumer's household are tapped for basic facts used in compiling current statistics on agriculture.

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The four decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; April 1, 1930; and April 1, 1940. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. Comparison of inventory numbers of livestock from census to census is seriously affected by a change in the date of enumeration. From January to April there are material changes in numbers on hand in most parts of the country due to births, marketings, farm slaughter, etc. In an effort to obtain as much comparability as possible the 3 censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of the 1945 Census of Agriculture Reports shows a complete history of the enumeration of livestock and presents a discussion of the comparability from census to census.

For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy, and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained from about 85,000 farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers consist of the aggregate value of a fixed quantity of goods, based on current midmonth prices for these commodities, expressed as a percentage of the aggregate value of the same quantity of goods in the base period. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the per unit exchange value of farm products.

Data in imports and exports are now compiled by the Department of Commerce, Bureau of the Census, and are published in the annual report, Foreign Commerce and Navigation of the United States. (See section 30, Foreign Commerce of the United States.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

### No. 689.—FARM PRODUCTION—INDEXES OF VOLUME, BY MAJOR GROUPS OF PRODUCTS: 1927 TO 1946

[1985-39=100. Indexes based on estimates of production for sale and for consumption in farm homes. Excludes products fed to livestock or used for seed. Calendar year production of livestock and livestock products is compared with crop production of same year. Commodities covered by index contributed about 93 percent of gross farm income during 1935-39]

<sup>1</sup> Figures revised to exclude distilled liquor.

 Based on total exports of domestic merchandise.
 Imports for consumption beginning with 1934; general imports prior thereto. 4 Not available.

Source: Department of Agriculture, Office of Foreign Agricultural Relations; annual report, Agricultural Statistics. Based on data compiled by Department of Commerce, Bureau of Foreign and Domestic Commerce and Bureau of the Census, and predecessor organizations. See source note, table 696.

Based on data for 122 agricultural import classifications.
 Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, teas, and spices.

#### No. 699.—ACREAGE LOSSES—ESTIMATED ACREAGES OF CERTAIN CROPS PLANTED AND NOT HARVESTED: 1929 TO 1946

n thousands of acres. Acreages for winter wheat represent areas sown preceding fall and not harvested, thus including considerable land subsequently planted to other crops. Acreages for cotton include more than 10 million acres plowed under in 1933. Excludes acreages of grains cut for hay. Totals do not show total crop losses thiefly because of large acreage of hay land which produced only pasturage in some dry seasons] (In thousands of acres.

<sup>1</sup> Includes rice, buckwheat, potatoes, sweetpotatoes, sugar beets, and dry field peas.

<sup>&</sup>lt;sup>1</sup> Relative production as indicated by multiplying production of crops of each year by 1927–32 average prices and dividing aggregate for each year by average aggregate for same crops during 1923–32 (predrought) period.

<sup>2</sup> Corn, oats, barley, sorghums for grain, wheat, rye, buckwheat, rice, flaxseed, cotton, all hay, sorghums for forage and sillage, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, sugar beets, and cowpeas.

<sup>3</sup> Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

<sup>4</sup> Asparagus, snap beans, cabbage, cantaloupes (including honeydews, honeyballs, and miscellaneous melons), carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Excludes production of farm gardens, home gardens, and most of market gardens.

<sup>4</sup> Appless, peaches, pears, grapes, plums, prunes, oranges, grapefruit, lemons, apricots, strawberries, cranberries, and olives.

Source: Department of Agriculture, Bureau of Agricultural Economics; published in Crops and Markets and in annual summary, Acreage, Yield, and Production of Principal Crops.

<sup>&</sup>lt;sup>1</sup> Excludes 14.803,000 acres of corn cut for fodder, valued at \$206,935,000, probably duplicated in acreage of corn harvested for grain. 3.107,000 acres of mature crops hogged off (corn, velvetbeans, soybeans, peanuts, sweetpotatoes, etc.) also excluded.

<sup>2</sup> Total acreage of crops for which figures are available.

<sup>3</sup> Irish and sweet potatoes included with "field crops," not with "vegetables." Acreage of vegetables represents acres of vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables

or home use and for sale.

\* Excludes acreage of horticultural specialties (not available for 1944); value includes horticultural specialties.

\* Excludes acreage for alfalia, clover, and grass seeds harvested, probably duplicated in hay acreage.

\* Only strawberries reported in small fruits; other small fruits included in field crops.

\* Vegetables for sale.

\* Farm garden vegetables for home use only.

\* Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930.

\* Excludes acreage for horticultural specialties.

for home use and for sale.

Horticultural specialties				*********		129, 575	231, 259

1 Irish potatoes and sweetpotatoes included with "field crops," not with "vegetables."
2 Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milio maize.
3 Figures for 1944 are not fully comparable with those for 1939. 1944 totals are for States for which a separate including the separate included with small grains cut for hay.
4 Oat hay included with small grains cut for hay.
5 Excludes flax and wheat mixture.

 Excludes hax and whether mixture.
 Clover seed except sweet clover.
 Represents acreage of vegetables harvested for sale only; acreage in farm gardens not available.
 Acreage of horticultural specialties not available for 1944 and therefore excluded for 1939; value includes horticutural specialties.

Includes blackberries and dewberries, blueberries, boysenberries, loganberries, young berries, raspberries, and

straw berries.

<sup>1</sup> Figures for 1800 to 1895 represent commercial movement, as given by Dan Talmage's Sons Co.

Louisiana and Texas, 1900 to 1923; Louisiana only, 1924 to 1927; Louisiana and Florida, beginning 1928.

Data for linters included 1810-1865; excluded for subsequent years.

Beginning 1899, ginnings as reported by Bureau of Census. Figures for some years include small amounts of Baja California, Mexico, cotton ginned in United States. Round bales counted as half bales.

Gross weight. Figures prior to 1899 compiled by Bureau of Census from reports published by Department of Agriculture. See also note 10, table 703, p. 640.

Census figures for 1870 and 1880 represent estimated average production for 1863-71 and 1880-82, respectively.

Ginnings.

Source: Dept. of Agriculture, Bureau of Agricultural Economics, except as noted; annual report, Agricultural Statistics. Also published currently in Crops and Markets.

No. 703.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1866 TO 1946

[Tens are of 2,000 pounds. For weights of units of measurement for principal products, see Appendix, p. 970. Approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 55; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to census data]

<sup>&</sup>lt;sup>1</sup> Values are based on season average or Dec. 1 prices. See notes on "Price" column.
<sup>2</sup> Received by farmers. Beginning 1908, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for 1937, 1940, and 1941 for corn, 1938 through 1942 for wheat, and 1940 through 1944 for rye, include an allowance for unredeemed loans at average loan value.

Values are based on season average or Dec. 1 prices. See notes on "Price" column.
 Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flaxseed, beginning 1906; rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for 1940 through 1942 for barley and 1942 and 1943 for flaxseed include an allowance for unredeemed loans at average loan value.

<sup>1</sup> Values are based on season average or Dec. 1 prices. See notes on "Price" column.
4 Received by farmers. Beginning with 1908 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cotton-seed, prices are season average prices. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, 1939, and 1949 through 1942, season average prices for cotton crops include an allowance for unreleemed loans at average loan value.

ionn value.

1 Average for 8 years.

4 Average for 6 years.

5 Average for 7 years.

5 Average for 8 years.

6 Average for 6 years.

7 Average for 7 years.

6 Average for 4 years.

6 Includes 7,402,000 bushels in 1924, 65,000 bushels in 1931, and 2,175,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.

15 State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja, California, ginned in California from 1913 to 1924, has been excluded.

16 Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

<sup>12</sup> Data for 1909 and 1910.

<sup>&</sup>lt;sup>13</sup> Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

alues are based on season average or Dec. 1 prices. See notes on "Price" column. ecolved by farmers. See also notes on prices for each crop. ased on the reported price of grain sorghums. 16 Equivalent solid acreage.

is Equivalent solid acreage.

rices are season average prices, prices of beans being for cleaned beans.

verage for 1929 and 1930.

arm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans r than to the total production.

verage for 1924 and 1925.

bec. 1 prices, 1916 to 1931; beginning 1932, season average prices.

cludes 5, 436,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, and 2,813,000 pounds in, not available for marketing because of economic conditions and the marketing agreement allotments.

s and values are computed on the harvested crop.

Values based on season average or Dec. 1 prices. See notes on "Price" column.
 Received by farmers. Prices as of Dec. 1 except as noted.
 Prices are season average prices beginning 1919; Dec. 1 prices theretofore.

<sup>#</sup> All hay.
Dec. 1 price.

<sup>##</sup> All hay.

## Dec. 1 price. Prior to 1942, price of sweet sorghums for forage and hay.

## Average for 1929 and 1930.

## Prior to 1939, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on trees but was destroyed prior to picking. Figures relate to crop produced from bloom of year shown. In California, picking season usually extends from about Oct. 1 to Dec. 31 of following year. In other States, season begins about Oct. 1.

## Prices are season average.

## Net content of boxes varies. In California and Arizona, approximate average is 77 lbs.; in other States, 90 lbs.

## Beason average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 34.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. 8. averages.

## Production includes following quantities donated to charity, unharvested, and/or eliminated on account of economic conditions: 1933, 977; 1934, 1,396; 1935, 614; 1936, 1,023; 1937, 1,294; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 762; 1942, 634; 1943, 830; 1944, 1,771; 1945, 722. Price and value are computed on remaining grop.

### No. 712.—Cotton and Cottonseed—Acreage, Production, and Value, by States: 1911 to 1946

[Cotton production excludes linters.—Figures for production in some States differ slightly from census figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not shown for individual States, separate data are not available for entire period but are included in United States totals. Values shown are for marketing season or crop year and should not be confused with calendar year income. Yields and prices for periods are simple averages of figures for individual years. Tons are of 2,000 pounds]

Estimates of commercial crop production in commercial apple areas of each State; includes fruit produced for sale to commercial processors, as well as for sale for fresh consumption.
 See note 3, table 716.
 Preliminary.
 Less than 1,000 bushels.

¹ Season average prices, except citrus fruit prices, which are equivalent packing-house-door returns for all methods of sale.
² Preliminary.
³ In some years, production includes some quantities not harvested on account of economic conditions or scarcity of harvest labor or donated to charity.
⁴ Prices are for prunes used fresh and for small quantities of canned and dried.
³ Prior to 1939, data are for 7 States. See also table 703, p. 642.
³ Net content of box varies. In California and Arizona approximate average is 65 pounds net; in Florida and other States, 80 pounds net.

7 About 79 pounds net.

Beginning 1934, estimates refer to production of apples in commercial apple areas of each State and include fruit produced for sale to commercial processors, as well as that for sale for fresh consumption.
 A verage for 1909 and 1910.
 Includes some quantities not harvested on account of economic conditions or scarcity of harvest labor.
 A verage for apples is for 1934 and 1935.

Source: Data collected by Dept. of Agriculture, Bureau of Agricultural Economics, through the Hawaiian Sugar Planters' Association. Published in annual report, Agricultural Statistics, and in The World Sugar Statistics.

<sup>1</sup> Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

2 Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)

3 Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.

4 Not including sirup production. See table 724.

4 Includes price support payments of \$1.45 per ton in 1945. Excludes Government payments under Sugar Act of \$1.21 per ton in 1945 and approximately \$1.25 in 1946.

Age of cane equals 18 to 22 months of growth.
 See note 2, table 725.
 One ton of raw sugar 96° test is assumed to be equivalent to .9346 ton of rafined.
 Based on tonnage of cane used.

<sup>&</sup>lt;sup>1</sup> For factor used in converting raw sugar to refined, see note 8, table 730. <sup>2</sup> Ton of 2,000 pounds. <sup>3</sup> Actual quantity of sugarcane harvested, including 6,392,547 tons of sugarcane cut for production of sugar, and 1,125,914 for production of high-grade molasses. It is estimated that about 1,935,542 tons of sugarcane were left standing and harvested following year.

For footnotes, see next page.

<sup>1</sup> Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.
2 Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.
3 For 1900 to 1906, shipments to United States.
4 Statistics for 1874 to 1880 represents exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.
5 Exports 1871 to 1911, production 1912 and subsequently. Includes production of museovado and panocha, low grades of sugar mostly for domestic consumption.
6 Less than 500 tons.
7 One year only.
8 Louisiana and Texas 1909 to 1922; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

<sup>1</sup> Beginning 1910, stocks on hand are taken into account. Figures for 1910-20 are for cane sugar only; 1922-34 includes stocks of raw cane sugar in all ports and best sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by best sugar factories, as reported by Sugar Division, U. S. Department of Agriculture.

3 Best sugar converted to raw at rate of 1.975 through 1930.

3 Includes Hawali, Postto Rico, and the Philippines; Virgin Islands included beginning July 1, 1917.

4 No account taken of sugar imported in ether forms. Imports from Philippines Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932; imports for consumption beginning 1933.

5 Includes shipments to Hawali and Puerto Rico for all years, to Alaska beginning 1932, and Virgin Islands beginning Jan. 1, 1985. Excludes direct exports to foreign countries through customs districts of noncontinguous territories.

territories.

6 Sugar used in manufacture of other commodities for exports on which drawback was paid, taken into account beginning 1910.

7 Includes sugar available for military services in U. S. and abroad for 1941–45.

8 Raw sugar converted to refined by multiplying by following factors: For years prior to 1922, 0.9996; 1922–30, Cuba and Hawaii, 0.9368; Puterto Rico, 0.9368; Philippine Islands, 0.96; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

Source: 1878 to 1909, computed from production as reported by Department of Agriculture, and exports, imports and shipments as reported by Department of Commerce, Bureau of Foreign and Domestic Commerce; thereafter, based on data ir: tables 739 and 730.

I Exports assumed to be wholly from sugar imported from foreign countries.
2 Hawaii, Puerto Rico, and Philippine Islands and beginning July 1, 1917, Virgin Islands.

No. 782.—Cotton—Production, Consumption, Exports, Imports, Prices, and Carry-Over: 1905 to 1946

[All figures, except average net weight and price, in theseands of bales. Production figures relate to crop of preceding year and are compiled from individual reports of ginners. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905]

Glycerin, crude (100% basis)	172, 450	180, 717	12, 979	156, 828	162, 322	9, 406		
Clycerin, ing gravity and yellow distilled (100% basis).  Glycerin, chemically pure (100% basis).  Hydrogenated oils, edible.  Hydrogenated oils, inedible.  Shortening.  Winterired vegetable oils.	89, 530 83, 264 1, 080, 196 262, 385 1, 440, 859 316, 408	91, 339 87, 188 1, 022, 932 269, 690 6, 220	15, 135 17, 606 30, 711 11, 492 33, 533 30, 317	64, 180 84, 383 1, 015, 198 171, 568 1, 450, 501 298, 035	73, 868 67, 629 969, 642 170, 140 8, 777	15, 310 17, 979 30, 415 12, 353 41, 234 19, 039		

Data from peanut-oil producers were collected by U. S. Dept. of Agriculture.
 Included in "all others" to avoid disclosing operations of individual establishments.

Included in "all others" to avoid discious of mutricuss establishments.
Included in cod oil.
Data for "other fish" consumption during 1946 indicate an excess of approximately 20,000,000 pounds over supply. This may be accounted for, in part, by duplication in consumption of 5.127,000 pounds reported once by hydrogenstors and again when further processed by fat splitters and other users. Other consumption duplication involving similar cases, plus possible understatement of production, may account for the remaining diserepancy.

Not shown to avoid disclosure of operations of individual establishments.

<sup>&</sup>lt;sup>1</sup> Overvalued, due to depreciation of Brazilian paper milreis.

<sup>2</sup> Average, July 1, 1915, to Dec. 31, 1920.

<sup>3</sup> Represents civilian consumption per capita, calculation of which excludes amounts allotted to the military population and takes into account changes in stocks. Net imports per capita, including civilian population, and military population in the U. S. and abroad, were as follows: 1941, 16.86 pounds; 1942, 12.73; 1943, 16.03; 1944, 18.22; 1945, 19.31; and 1946, 19.00. Stocks at end of year were: 1940, 467,198,832 pounds; 1941, 582,669,138; 1942, 197,488,068; 1943, 466,008,348; 1944, 550,003,608; 1945, 548,151,744; 1946, 511,908,120. Annual amounts accepted by the military were: 1941, 92,000,000 pounds; 1942, 267,000,000; 1943, 320,000,000; 1944, 451,000,000; 1945, 563,000,000; and 1946, 15,000,000.

#### No. 789.—TEA—NET IMPORTS: 1830 to 1946

[Quantity, except per capits, in thousands of pounds; value in thousands of deliars; per capits in pounds. Years ended June 30 through 1918; thereafter, calendar years. Beginning 1919, data relate to trade of continental United States only (see headnote, table 738); prior to that time the small trade between the United States and noncontiguous territories is not included]

Average for period July 1, 1915 to Dec. 31, 1920.

Represents civilian consumption per capita, calculation of which excludes amounts allotted to the military population and takes into account changes in stocks. Net imports per capita, including the civilian population and the military population in the U. 8. and abroad, were as follows: 1941, .76 pounds: 1942, .35; 1943, .65; 1945, .59; and 1946, .52. Stocks at end of year were: 1940, 51,185,000 pounds; 1941, 48,631,000; 1942, 22,194,000; 1943, 23,294,000; 1944, 35,689,000; 1945, 34,449,000; and 1946, 52,284,000. Annual amounts accepted by military were: 1942, 6,000,000 pounds; 1943, 15,000,000; 1944, 6,000,000; 1945, 13,000,000; and 1946, 900,000.

Source of tables 728 and 739: Dept. of Commerce, Bureau of Foreign and Domestic Commerce through April 1941, Bureau of the Census thereafter; compiled from data in annual report, Foreign Commerce and Navigation, and from data on shipments to and from Territories and possessions.

No. 740.—Cocoa and Chocolate—Imports: 1871 to 1945

<sup>Reports include meal in terms of grain (4 busness of corn to 1 barrel of meal).

Reluding recoports.

Imports for consumption, beginning 1933; general imports prior thereto.

1858-61; no data for 1857.

1858-61; no data for 1857.

Not reported separately.</sup> 7 Less than 500.

<sup>\* 3-</sup>year average; not shown separately for other years.

Includes Commodity Credit wheat in transit and stored in steel and wood bins: 1942, 4,409,000 bushels; 1943, 58,990,000 bushels; 1944, 32,381,000 bushels, and 1945, 23,700,000 bushels.

Prior to 1937 some new wheat included; thereafter figures represent only old crop wheat.

Bureau of Census figures raised to represent all merchant mills. Stored for others 1926-29, estimated by the Bureau of Agricultural Economics in the absence of actual figures.

Imports include full-duty wheat (that paying a duty of 10 percent ad valorem) and dutiable flour in terms of wheat, and exclude flour free for export.

Not available prior to 1930.

For individual items see "Supply," above.

Source: Department of Agriculture, Bureau of Agricultural Economics, except for imports which are from Bureau of Foreign and Domestic Commerce through April 1941 and from Bureau of Census thereafter. Published in annual report, Agricultural Statistics, and in The Wheat Situation.

### No. 745.—Corn, Wheat, and Oats—Commercial Stocks, by Months: 1936-37 to 1945-46

[In thousands of bushels. Pounds per bushel: Wheat, 60; corn, 56; oats, 82. Represents domestic grain in store in public and private elevators at terminal markets and affect in vessels or barges in harbors of lake and seaboard ports; excludes grain in transit, stocks in mills or elevators attached to mills, or private stocks intended for local use. Stocks are as reported on Saturday nearest first of each month. Official statistics not compiled prior to January 1922. Bradstreet's visible supply is given for earlier years in the 1935 and previous issues of the Statistical Abstract]

<sup>1</sup> Includes Hawaiian production.
2 Included in "other fruit juices."

Includes small receipts from Puerto Ries.
 Included with "all other."

Bource: Department of Commerce, Bureau of Foreign and Domestic Commerce in cooperation with Bureau of the Census and Office of Price Administration; Fruit and Vegetable Canning Industries, 1924-45, and supplementary reports prepared by Bureau of Foreign and Domestic Commerce in cooperation with Bureau of the Census and Department of Agriculture.

#### No. 751.—Domestic Animals on Farms—Number and Value: 1880 to 1947

[For census years prior to 1910 and for Jan. 1 estimates by Dept. of Agriculture, animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. Difference in date of enumeration affects comparability of census figures for all classes and especially

## No. 762.—Meats and Lard—Production, Foreign Trade, and Consumption, by Kind: 1937 to 1945

[All amounts, except per capita, in millions of pounds. Pork production represents total hog-carcass weight, less raw fat from carcass rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and nonfederally inspected wholesale slaughter. Exports and imports of meats comprise the several kinds of meat converted to a dressed-carcas-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawali, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks. Figures for recent years are subject to revision]

	1	PRODUCTION			6.7	CONSUMPTION

Cream and Neufehatel.
 Includes dry skim milk for animal feed.
 Includes data for ice cream made by counter freezers and by other small retailers.

Excludes farm butter and milk equivalent of whey butter.
 Excludes cottage, pot, and bakers' cheese.
 Excludes product made from skimmed milk.
 Excludes milk equivalent of butter or concentrated milk used as sources of fat in ice cream. Beginning with 1943 includes ice milk and sherbet.
 Includes dry cream, dry part-skim milk, and dry ice cream mix.

Source: Frozen fish, Department of Interior, Fish and Wildlife Service; annual summary, Frozen Fish, 1946. Other figures, Department of Agriculture, Production and Marketing Administration; annual report, Agricultural Statistics; also published in monthly mimeographed reports.

Frozen eggs may be converted to eases on basis of 37.5 pounds to a case.
 Previous to January 1943, holdings of frozen fish were for 15th of each month.

# No. 776.-Wool-Production, Imports, and Exports: 1889 to 1945

[In themsands of pounds. Production, except census data, estimated and for calendar years; figures for 1933 and later years, revised estimates, based on 1935 census data. Pulled wool included beginning 1900 and probably included for 1870 to 1899, though exact basis of estimates for these years is not known. Figures for 1839, 1846, and 1850 include only fleece. Exports and imports for 1839 are for fiscal year ended Sept. 30; for 1849 and 1830, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of Angora goat, alpaca, and other like animals]

Average for fiscal years 1913 to 1915.
 Exports for fiscal year ended June 30.
 Not reported separately for 1911; no exports in 1912.
 Imports for consumption beginning 1933; figures for prior years are general imports.

Preliminary.
 Wyo., Mont., Utah, Nev., Colo., N. Mex., eastern Oreg., and parts of Dakotas.
 Imports for consumption beginning with 1965; general imports prior to 1963.
 Because of changes in tariff laws in 1962, much wool of kind formerly classifiable as "clothing" is now classifiable.

fied as "combing."

\*\*Corpet excludes "not finer than 40's" beginning 1931.

Scoured wool plus greasy wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.
 Shorn wool reported greasy plus pulled wool reported greasy raised to a "greasy-shorn" basis, and shorn and pulled wool reported scoured raised to a "greasy-shorn" basis, conversion factors varying with class, origin, grade, and whether shorn or pulled.
 Wool regarded as more or less suitable for apparel purposes; formerly "Combing and ciothing."

# 25. Forests and Forest Products

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, is making an inventory of the forest resource and is measuring rates of forest growth and drain. number of reports for surveyed areas have been published. The most recent of these are a series of reports based on a reappraisal of the Nation's forest situation made during 1945 and 1946. Tables on forest areas, stand, growth, and drain (Nos. 782-785) are from the preliminary report of this series, Basic Forest Statistics for the United States. Other reports from this series are (1) Gaging the Timber Resource of the United States, (2) Potential Requirement for Timber Products in the United States, (3) The Management and Status of Forest Lands in the United States. Other reports to follow these will deal with different aspects and the situation as a whole. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The Statistical Supplement to the Annual Report of the Chief of the Forest Service carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufactures, in addition to annual reports of the Census of Forest Products. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural and Industrial Chemistry of the Department of Agriculture publishes annual reports of the production of naval stores.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

The Timber Products and Pulp and Paper series of the Industry Reports, published by the Bureau of Foreign and Domestic Commerce in cooperation with other government agencies, carry forest products statistics which have been developed to meet current needs for information.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. As explained in the headnotes to the following tables, however, the data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, are believed to be practically complete. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

<sup>&</sup>lt;sup>1</sup> Includes land capable of producing timber of commercial quantity and quality, and available now or procedively, for commercial use. Status beginning 1945.

<sup>1</sup> Western and central portions of Oklahoma and Texas included in the Plains region; eastern portions included in the West Gulf region.

<sup>1</sup> Eastern and central portions of South Dakota included in the Plains; southwestern portion (Black Hills) included in the North Rocky Mountain region.

# No. 788.—Saw Timber on Commercial Forest Land, by States

In millions of board feet. Status beginning of 1945. Includes volume on land capable of producing timber of commercial quantity and quality and available now or prospectively for commercial use. Includes trees large enough for sawlogs regardless of actual use, in accordance with practice of region. Volumes on lumber-tally basis

Balsam fir.
 Ponderosa pine.
 Excludes dead chestnut of sawlog size still standing and usable.
 May include some white fir, Sitka sprace, western hemlock, Port Oxford cedar and western red cedar commonly lumped with Douglas-fir in redwood cruising.
 Excludes 416 million board feet in Plains region.
 Includes Jeffery pine.
 Includes western white pine, mountain hemlock, and lodgepole pine recorded in cruises of fir areas.
 Redwood exclusive of volume of 1,000 bigtree on cruises in west-side Sierra subregion.

Source: Department of Agriculture, Forest Service; annual report, National Forest Areas.

¹ Within established boundaries. Area under Forest Service Administration includes federally owned lands in purchase units which have not been proclaimed as national forests, lands approved for acquisition, but unacquired, experimental forests and ranges and all small federally-owned administrative sites outside of established boundaries, and lands within national forest boundaries which have been transferred from Soil Conservation Service and other Federal agencies but do not have a national forest status.

³ Excludes those lands outside national forest boundaries transferred from Soil Conservation Service and other Federal agencies, and requiring Presidential or Congressional action to extend a national forest status.

³ Outside established boundaries. Area under Forest Service Administration comprises lands acquired by United States in pursuance of certain national programs of land utilization and adjustment, which by Order of the Secretary of Agriculture have been placed under administration of Forest Service but have not yet been given a national forest status. Portions of these project lands, located within established national forest or purchase unit acreage. Fort Bayard Reservation, New Mexico, was placed under administration of Forest Service by Federal Works Agency.

Source: Department of Agriculture, Forest Service; records.

etc.

In continental U. S. and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.

Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.

Included in State and private forests, protected area.

# No. 792.—Lumber—Production, by Kind of Wood, and Average Mill Value

Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1942 and exclusion of mills cutting less than 80 M ft. b. m. for all years prior to 1942 except 1869–1909, and 1919. Exclusion of under 50 M class of mills would affect totals less than 1 percent as reflected by 1942 survey. Data for 1943–45 include estimates for the East based on sample surveys. Small production quantities are subject to large sampling errors

[Quantities in millions of heard feet; average mill value per 1,000 heard feet]

Data not available.
 Includes 298,000,000 board feet of lumber not reported by kind of wood.
 Excludes 165,305,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.
 Totals include species not shown separately.
 Less than 500,000 board feet were reported.
 Included in "Other hardwood."
 Includes magnolia.

# No. 797.-LATH AND SHINGLES-PRODUCTION: 1899 TO 1945

[Lath in thousands and shingles in squares. Shingles reported in thousands prior to 1933 and converted to squares on basis of 800 shingles to square. See headnote, table 792 for explanation of lack of comparability of statistics. Data for shingles reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production]

Source: Department of Commerce Bureau of the Census; reports of Biennial Census of Manufactures; 1943 production by process, from Pulp and Paper Series—Special Report D; annual report, Census of Pulp Mills and of Paper and Paperboard Mills, Facts for Industry Series M14A.

<sup>&</sup>lt;sup>1</sup> Beginning 1914 includes screenings.

<sup>2</sup> Includes data for existing mills not classified as producers of pulp before 1940. In that year data for 6 mills not previously classified as producers of wood pulp were included for first time. For same reason, an additional mill was included in 1941, and 2 more added in 1943.

<sup>3</sup> Includes data for 25 existing mills not previously classified as producers of paper and paperboard.

<sup>4</sup> Includes estimated production of insulating board for 1 mill. Estimates were made on assumption that production of this mill was proportionately the same in 1942 and 1943 as in 1943.

New basis, see table 803.
 Included in "Other States" to avoid disclosing data for individual establishments.
 Includes Tennessee.
 Includes South Carolina.
 Includes Maryland.
 These processes represent recent developments; production for 1989 and earlier years only a small proportion of

1 Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ended Mar. 31. All other figures relate to calendar years.

2 Figures compiled from data reported by establishments in Turpentine and Rosin industry.

3 Figures compiled from data reported by establishments in Wood-Distillation industry.

4 Not reported.

5 Includes, for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of humber and timber products.

6 Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1923-32, 28,700 drums; 1923-34, 28,048; 1924-35, 27,200.

7 Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

8 Includes data for rosin produced from reclaimed gum: For 1925-36, 43,250 drums; 1926-37, 34,155; 1937-38, 21,017; 1928-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,765; 1942-43, 11,297; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538.

9 Figures do not include data for rosin produced from reclaimed gum. See note 8.

# 26. Figheries

The Fish and Wildlife Service, Division of Commercial Fisheries in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing vessels at Boston, Gloucester, and New Bedford, Massachusetts; Portland, Maine; and Scattle, Washington; shad fisheries of the Hudson and Potomac Rivers: alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery: a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products. These data are summarised in the Statistical Abstract. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

# No. 811.—FISHERIES—DISPOSITION OF DOMESTIC CATCH: 1941 TO 1946

[Includes Alaska. A large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil in addition to whole fish used in manufacture of these products. In 1941 about 775,000,000 pounds of waste were used in production of meal and oil. In subsequent years about 600,000,000 pounds of waste were used for this purpose each year]

# 27. Mining and Mineral Products

This section summarises the principal statistics relating to the mineral industries and mineral products. It includes not only the crude and prepared minerals associated with the mineral extraction, but also some of the finished products manufactured from minerals. Statistics relating to the manufacture of mineral products are also included in section 29, Manufactures. Additional information relating to the mineral industries and mineral products appear also in other sections of this Abstract such as the section on labor force, prices, foreign commerce, and others.

Most of the statistics in this section are from the Bureau of Mines and the Bureau of the Census, with additional material from other Government agencies such as the Bureau of Labor Statistics, Bureau of the Mint, and the Interstate Commerce Commission and from non-Government sources such as the Engineering and Mining Journal, American Metal Market, the Iron Age, and the American Gas Association. Data in this section cover the following areas unless otherwise indicated: Bureau of Mines production statistics, continental United States, and, for leading products, outlying areas; Bureau of Census statistics, continental United States; foreign trade statistics, the United States customs area, which includes Alaska, Hawaii, Puerto Rico, and for 1935 to 1939, the Virgin Islands.

Mineral statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey or by the Bureau of Mines since 1880. The principal statistics have been published annually through 1931 in Mineral Resources of the United States and thereafter in the Minerals Yearbook. Data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and prepared minerals recovered, by method of treatment; and mineral content of materials produced. Data on production are sometimes available by method of extraction. Shipments or sales of products are classified in many cases by grade, by end use, or by State of destination. The Bureau of Mines also collects and publishes separate data on employment and accidents. The number of workers and man-days or man-hours worked, as measures of exposure to accidents, are tabulated only for broad industry groups.

Censuses of mineral industries have been taken approximately every 10 years since The statistics are collected and published in the Census volumes in such a manner as to relate the statistics on the production of the various minerals as nearly as possible to data on employment, principal expenses, fuels and power consumed, and other information available only for each establishment as a whole. Each establishment is classified according to its most valuable product. The data are also collected and compiled in a manner to permit integration with other Census statistics such as for manufactures and wholesale and retail trade. Data are available on the number of operations, quantity and value of products, number of persons engaged (sometimes by department or type of work), principal expenses (wages, salaries, cost of supplies and materials, fuel, purchased electric energy, and work done on contract). horsepower of power equipment, and sometimes other items, such as man-hours, cost of buildings, machinery and equipment, number and type of power-loading machines. cost of drilling oil and gas wells, development work, and capital invested. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals.

To avoid misinterpretation, it should be noted that the Census of Mineral Industries statistics in tables 823-825 relate to operations primarily engaged in extracting minerals

and in such primary mineral-preparation activities (crushing, screening, washing, flotation, etc.) as are needed to render the minerals marketable. Many of the statistics collected by the Bureau of Mines represent products of operations beyond the limits covered by the Census of Mineral Industries. Value totals based on Bureau of Mines publications, as shown in tables 819 and 822, are not comparable with the Census value totals, as shown in tables 823–825. Census values represent crude or prepared minerals f. o. b. the mine, well, or mineral-preparation plant. Bureau of Mines value totals include for most metallic products the value of ingot metal rather than the value of ores and concentrates, the value of natural gas at points of consumption rather than at wells, and the value of such manufactured products as cement and lime rather than the value of the limestone used in producing them.

No. 819.-MINERAL PRODUCTS OF THE UNITED STATES-VALUE, FOR METALLIC AND NONMETALLIC: 1881 TO 1945

Flasks of 75 pounds prior to 1927; 76 thereafter.
 99 percent tin, 1896-1919; Straits tin thereafter.
 Prices 1896 to 1929 for pure aluminum (No. 1 virgin 98-90 percent); heatinning 1930, for 99 percent+virgin ingot.
 Prices 1996 to 1898 are for Lake copper.
 Data are for New York sinc.

A verage for 1899 and 1900 only.
 A verage, 1903-05; average for New York sine 1901-05, 5.068 cents.

A verage for 4 years.
Connecticut Valley.

### No. 821.—MINERAL PRODUCTION, BY STATES AND FOR ALASKA: 1939 to 1945

[Sum of State totals in table below does not agree with total for United States given in tables 319 and 322 chiefly because (1) figures for certain of products included in United States total are not available by States of origin; (2) use of iron ore values in State totals and pig iron values in United States total; (3) use of mine figures for gold, silver, copper, lead, and zine in State totals and mint and smelter figures in United States total; and (4) inclusion of estimates in United States total for a few products for which no canvass has been conducted for many years and for which no estimate by States is made]

[Values in thousands of dollars]

No. 822.—MINERAL PRODUCTS OF THE UNITED STATES—QUANTITIES AND VALUES: 1930 TO 1945

(Sheet sees are 2,600 pounds; long sons, 2,240 pounds. Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mines; and some of the figures for 1945 are preliminary. Total values of metallic and nonmetallic products include figures which Burran of Mines is not at liberty

Companies with operations in more than 1 industry are counted only once in totals.

See note 3, table 826.

Represents permanent additions and major alterations (including installation costs); minor additions and replacements and cost of land are excluded.

See note 9, table 825.

Not shown because of dissimilar products.

<sup>|</sup> See note 9, table 826.
| Not shown because of dissimilar products.
| Includes amounts received by or due contractors for services performed during year.
| Includes statistics for 334 salaried employees paid \$1,091,000 at central offices that served more than 1 mineral industry.

industry.

11 Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part expenditures for "Contract work" reported by producing operations.

12 Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$150,000. These expenditures are not included in totals shown.

18 Crude petroleum, 1,228,123,126 barrels (42 gallons); natural gas, 2,928,134,538 M cubic fact, of which 2,267,413,236 M cubic fact, of which 2,267,413,236 M cubic fact were marketed.

19 Includes data for 26 strip-pit and culm-bank contractors.

Not shown because of dissimilar products.

Not shown because of dissimilar products.

Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.

10 Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$180,000. These expenditures are not included in totals shown.

11 Tons of 2,240 pounds.

\*\*\*East than \$601.

<sup>\*\*</sup> Contractors engaged chiefly in development work for other concerns in mineral industries; Pennsylvania anthractic strip-pit and culm-bank contractors are excluded. Statistics for contractors performing oil- and gasfield services exclude data for oil- and gas-field work performed on contract by concerns that also operated oil and gas wells for their own account unless separate reports were obtained for each of these two types of activities. Statistics are also excluded for concerns rendering oil- and gas-field services or producing crude petroleum, natural gas, or natural gasoline whose reports covering these activities indicated that neither the value of products and services rendered, nor reported principal expenses, nor cost of buildings, machinery, and equipping wells amounted to as much as \$2,500 during 1939. Statistics for contractors performing general services for mineral industries exclude data for contractors that received or were due less than \$2,500 for work done during 1939. work done during 1939.

Source: Dept. of Commerce, Bureau of the Census; reports of Census of Mineral Industries, 1939, Vol. I. 725543°-47--48

work done during 1839.

2 Represents amounts received or due for services performed during year.

2 Statistics cover, in general, only those operations that had reported principal expenses or cost of buildings, machinery, and equipment during year of at least \$2,500; for common sand and gravel corresponding minimum was \$15,000. Statistics include data for oil- and gas-field operations in States in which the reporting concerns had no products, provided the concerns were large enough to come within the scope of the census as defined in head-note of table 825.

No. 824.—Mineral Industries—Summary, by States: 1989

[Statistics cover producing operations only. For explanations of terms, see headnote, table 825, and appropriate footnotes, tables 823 and 825]

### No. 825.—Mineral Industries—Summary for the United States: 1919, 1929. AND 1939

[Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during year, or cost of drilling and equipping wells during year amounted to \$2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for common sand and gravel industry exclude data for operations that produce less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during year amounted to \$15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to \$2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than \$500 or cost of development work was less than \$5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years]

1 Excludes statistics for common clay and shale, crude petroleum and natural gas, greensand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

1 Excludes common clay and shale, common sand and gravel, glass-sand, foundry-sand, natural sodium compounds, peat, potash, and rock salt industries, and ilmestone mines and quarries operated in conjunction with cement and ilime plants for comparability with 1919.

3 Includes value of crude minerals produced, value added during year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

4 Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. A verage numbers of wage carners were derived by adding numbers reported for each month and dividing sums by 12.

5 Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. Number of salaried employees represents number receiving pay on a representative or normal day or pay-roll period—for 1939, during normal pay-roll period ending nearest Oct. 14; for 1939, on Dec. 14 or on nearest representative day; for 1919, on Dec. 15 or on nearest representative day. Salaries represents statistics for proprietors and firm members at operations and at central and branch offices.

6 Por 1939 includes installation costs, which are excluded for 1929.

8 Statistics for 1939 and 1939 refer to equipment in use or available for use at end of year.

8 Includes equipment, with rating of 8,365 horsopower, operated by purchased power other than electric energy.

Based upon average price of primary aluminum as reported to Bureau of Mines, or as quoted by the Engineering and Mining Journal and the American Metal Market.
 Includes aluminum and aluminum alloy ingots, scrap, plates, sheets, bars, etc.

# No. 827.—Copper—Production, Exports, Imports, and Consumption: 1910 to 1945

[In short tons (2,000 pounds). Production figures for unrefined copper cover United States and Alaska. Output of copper from foreign crude materials also shown under refined copper production. Consumption as shown represents quantity withdrawn from total new supply on domestic account (apparent consumption) not actual consumption, largely because consumes' inventories are not taken into account. Over a period of years, however, apparent consumption data give a good indication of consumption trends]

### No. 830.—Copper—Exports and Imports: 1891 to 1945

[Exports are those classed as "domestic" in foreign trade statistics but include copper smelted or refined in United States from imported ore or unrefined metal. Values include all forms of copper; quantities represent all copper except the small item, "Other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1891-1903 was estimated]

### [Quantities in short tons (2,000 pounds); values in thousands of dollars]

Includes small quantities produced in Massachusetts, Pennsylvania, and Georgia. Source: Department of the Interior, Bureau of Mines; Minerals Yearbook.

<sup>1</sup> Excludes ore sold for paint. 2 Not available.
3 Includes 643 long tons of byproduct ore not included in figures for districts in 1942, 663 in 1943, 593 in 1944, and 517 in 1945. Similar data not available for earlier years
4 Some magnetite included with hematite in all years.
5 Less than 500.

# No. 888.—Lead—Production of Refined Primary and Secondary Lead, 1830 to 1945, and by Class and Source, 1880 to 1945

(Production in short tons (2,000 pounds); values, except price per pound, in theusands of deliars. Figures, except those for antimonial and secondary lead, relate to new (primary) lead only; totals include lead derived from both domestic (including Alaska) and foreign ore. General production figures and production of desilverized lead exclude lead content of antimonial lead, shown in next to last column

Desilverized soft lead is included.

3 Soft lead, both desilverized and undesilverized, includes lead derived from Missouri ores and other non-reentiferous ores.

3 Excludes lead content of antimonial lead.

4 Not available. argentiferous ores.

<sup>Not available.

Estimate based upon American Bureau of Metal Statistics data.

Data from Tin-Lead-Zine Division of the Civilian Production Administration Includes some old, reclaimed, and scrap lead.

Includes reexports of foreign refined lead.</sup> 

No. 835 .- ZINC-PRODUCTION OF ORE, BY STATES, SMELTER PRODUCTION, AND PRIMARY SLAB ZINC AVAILABLE FOR CONSUMPTION: 1920 TO 1945

[All quantity figures in short tons (2,000 pounds); values in thousands of deliars. Excess of mine production over smelter production is due chiefly to export of ore]

<sup>&</sup>lt;sup>1</sup> Values at New York prices through 1907; at St. Louis prices, 1908 to 1914; at average price of all grades, 1915 and later years.

2 Computed at yearly average of high and low monthly prices at New York.

3 Consus year ended May 31.

4 Excludes premiums paid to miners by the Government.

White the Taleston Russau of Mines: Mineral

Source of tables \$25 and \$26: Department of the Interior, Bureau of Mines; Minerals Yearbook,

Includes Virginia.
 From Mexico in 1935; from Mexico, Canada, Newfoundland, and Peru in 1940; from Canada, Mexico, and Australia in 1943; from Mexico, Canada, Australia, Peru, Newfoundland, Argentina, and Bolivia in 1945.
 Includes small quantity of secondary electrolytic zinc.
 Excludes premiums paid to miners by the Government.
 Less than one-half of 1 ton.
 General imports.

No. 837.—Gold and Silver—Production in Continental United States. ALASKA, PUERTO RICO, AND PHILIPPINE ISLANDS: 1792 TO 1945

[Value of gold in terms of money, being at a fixed rate, is not shown in this table. Gold was valued at \$20.67+per fine troy ounce from 1837 until 1933. In 1933, however, various higher prices prevailed subsequently to Executive order of Aug. 29. Value of gold production for that year, as computed by Bureau of Mines, was \$85,338,000, including \$12,485,000 premium calculated at average weighted price (\$25.56 per ounce). On Jan. 31, 1934, legal value of gold was fixed at \$35 per fine ounce. Value given for silver is commercial value, except for 1921 to June 1923 and for 1934 and subsequent years (see footnotes 1 and 2), for which periods it has differed materially from coinage value]

<sup>&</sup>lt;sup>1</sup> Value prior to 1934 calculated on basis of \$20.67+ per fine ounce; in 1934 and thereafter, \$35.00 per fine ounce.
<sup>2</sup> Excess of return from industry over new material issued to industry.

# No. 839.—Silver—Prices, London and New York, and Value in the Dollar: 1835 to 1945

[London price is converted to basis of ounce 1,000 fine and converted to American money at par of exchange through 1920; thereafter, at current rate of exchange. London quotations are in depreciated currency after Sept. 21, 1931, also for some prior years, including 1918 to 1224. New York quotations are in depreciated currency after early March 1933. Commercial ratio is computed on ibasis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934, monetary value of gold is \$35.00 per fine ounce, as against \$20.67+ in previous years. Value of fine silver (37114 grains) in dollar is computed on basis of London quotations through 1917; thereafter on basis of New York average price]

[All figures, except "Commerical ratio to gold," expressed in dollars]

<sup>1</sup> Included in figure for "all other States."

No. 842.—Coal—Production, 1821 to 1945, and by States, 1921 to 1945

[Quantities in thousands of short tons (2,000 pounds); values in thousands of deliars. Figures relate to mines having an output of 1,000 tons or more a year for 1919, 1921, 1924 and subsequent years. Includes coal consumed at mines. Figures for anthractic relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes lignite and small amounts of anthractic outside Pennsylvania. Comparatively little coal is held in stock at the mines]

Figures for bituminous coal represent average value per ton less selling expense (Bur. of Mines series) prior to 1937; thereafter, average gross realization including selling expense (Bit. Coal Div. series).
 Based on total production as shown in table 342.
 Calculated at 303,5 working days in the anthracite field and 306 working days in the bituminous field.
 Of 2,000 pounds.
 Not available.
 1891.
 7 1896.

Not including fuel or bunker coal laden on vessels engaged in foreign trade.
 Including lignite, slack, and culm.
 Fiscal years ended June 30.
 A verage, July 1, 1905-Dec. 31, 1910.
 Not including data for coal laden on vessels on Great Lakes in 1906, 1907, and 1908.
 Imports for consumption; general imports prior to 1933.

### No. 846.—Work Stoppages 1 in Anthracite and Bituminous Coal Mining INDUSTRIES, BY MAJOR ISSUES INVOLVED: 1934 TO 1945

[Excludes strikes and lockouts involving fewer than 6 workers or lasting less than 1 day. Figures are for strikes beginning in years shown. For combined statistics covering strikes and lockouts in all industries, see table 239, p. 217]

¹ Geological Survey and Federal Power Commission. Represents consumption by public utility power plants in power generation, including a small quantity of coke amounting to approximately 100,000 tons annually.
¹ U. S. Bureau of Census.
² Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The I. C. C. reports that in 1944 consumption for all uses by class I line-haul railways plus purchases for class II and class III railways, plus purchases by all switching and terminal companies combined, was 136,303,000 tons of bituminous coal and lignite. Similar data from I. C. C. not yet available for 1945. ¹ Includes a small amount of anthracite.
¹ Estimates based upon reports collected by Solid Fuels Administration from a selected list of representative manufacturing plants and retail dealers.
² "Retail dealer deliveries" have been revised to include truck shipments from mines formerly included in "Other industrials."

Formerly designated "strikes and lockouts."
 Wages and hours were important issues also in some of these disputes. This is especially true in recent years.
 Totals include 6 stoppages, involving 500 workers and 2,000 man-days, in which issues were not reported.

# No. 848.—Natural Gas and Natural Gasoline—Production, 1906 to 1945, and By States, 1930 to 1945

[Quantities of gas in millions of cuble feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation] Consumption

NATURAL GAS

Preliminary. Includes States not shown separately.
 Includes 685,000,000 cubic feet piped to Mexico in 1940, 1,453,000,000 in 1943, and 1,474,000,000 in 1944.
 Includes 107,000,000 cubic feet piped to Canada in 1930, 29,000,000 in 1935, 54,000,000 in 1940, 32,000,000 in 1943. and 31,000,000 in 1944.

<sup>5</sup> Includes 44,000,000 cubic feet piped to Canada in 1935, 36,000,000 in 1940, 99,000,000 in 1943, and 112,000,000 in

<sup>1944</sup> 

<sup>6</sup> Includes 1,691,000,000 cubic feet piped to Mexico in 1930, 6,727,000,000 in 1935, 4,788,000,000 in 1940, and 9,626,000,-000 in 1943, and 12,959,000,000 in 1944. 
7 Includes Utah and Colorado.

### No. 849.-Manufactured-Gas Industry-Fuel Consumed, by Kind and by Use: 1929 to 1944

[Ceal and cehe in thousands of tons of 2,000 pounds; oil in thousands of gallons. Data revised to exclude completely operations of those utilities which have changed over from distribution of manufactured gas to natural gas at any time between 1929 and end of 1941]

FIND AND USE	1920	1932	1935	1938	1941	1942	1943	1944
By kind: Anthracite. Bituminous Coke purchased Coke produced '. Coke breeze Oil '.  By use: Generator fuels '. Boiler fuels. Bituminous coal carbonized Bench and producer fuels.	267 6, 138 1, 221 1, 931 368 637, 561 2, 786 1, 164 7, 051 8,55	115 5, 686 765 1, 367 475 537, 379 1, 857 837 6, 385	125 5, 774 716 1, 283 483 464, 097 1, 570 828 6, 522 744	181 5, 118 702 1, 209 353 576, 936 1, 639 766 5, 744 623	258 5, 378 732 1, 434 396 679, 596 1, 924 901 6, 156 653	300 6, 005 793 1, 531 457 740, 503 2, 115 1, 015 6, 772 715	343 5, 990 924 1, 683 494 770, 324 2, 408 1, 141 6, 840 728	291 6, 183 957 1, 677 495 836, 698 2, 465 1, 092 7, 000

<sup>&</sup>lt;sup>1</sup> Includes fuel used in production of reformed oil refinery gas.

<sup>2</sup> Oil used. For 1944, for carbureting water gas, 730,518,000 gallons; for making oil gas, 83,229,000; for boiler fuel 22,951,000 gallons.

### 850.—MANUFACTURED-GAS No. AND NATURAL-GAS INDUSTRIES—SUMMARY: 1929 то 1944

[Pepulation served and number of customers in thousands, gas produced, purchased, and seld in millions of cubic feet; revenue in thousands of deliars. Data for manufactured-gas industry revised to exclude completely operations of companies which have changed over to distribution of natural gas at any time between 1929 and end of 1944. Data for natural gas industry include these companies. Utilities distribution mixed gases with heating values higher than 900 B. t. u. per cubic foot are classified as natural-gas utilities. All butane or propane gases, or mixtures of such gases with air, included in manufactured-gas statistics. Natural gas sold for field use or for carbon black production is excluded]

<sup>4</sup> Excludes revenues from sales for resale.

Includes data for miscellaneous group not shown separately.
 Includes only ultimate consumers; sales for resale are excluded.
 Includes house heating.
 Includes data for electric generation.

<sup>11</sup> therm equals 100,000 British thermal units.

3 Available only to customers using less than 3,200 cubic feet per month, served under this rate schedule on or before Jan. 1, 1944.

4 Minimum bill representing a meter charge and including the first 1,000 cubic feet.

5 Bills include 5 percent utilities commodity tax for December 1945.

6 Bills include 3 percent tax.

7 Bills include 3 percent tax.

8 Bills include 3 percent tax December 1945 and 2 percent tax December 1946.

8 Bills include 1 percent tax December 1945 and 2 percent tax December 1946.

8 Minimum bill representing meter charge.

<sup>&</sup>lt;sup>1</sup> Quantities of stones not sold by short ton are expressed in approximate equivalents in short tons; expressed in their selling units, quantities for 1945 are as follows: Building stone (cut stone, slabs, and mill blocks), 3,038,120 cubic feet; monumental stone, 3,038,870 cubic feet; paving blocks, 212,570 (number); curbing, 158,260 cubic feet; and flagging, 268,480 cubic feet.

<sup>2</sup> Sandstone paving blocks included with "curbing."

<sup>3</sup> Limestone only.

Source: Department of the Interior, Bureau of Mines; Minerals Yearbook.

<sup>&</sup>lt;sup>2</sup> Shipments.

<sup>3</sup> All items except masonry, etc., include data for

Puerto Rico.

4 All items except masonry, etc., include data for Puerto Rico and Hawaii.

No. 867.—Salt—Production, Exports, and Imports, 1880 to 1945, and Production, by States and by Kind, 1925 to 1945

<sup>1</sup> [All quantity figures in short tens (2,000 pounds). Production figures represent sales plus that used by producers; they include Puerto Rico. Imports are imports for consumption]

### 28. Construction and Housing

No. 870.—Construction in the United States—Estimated Expenditures for PRIVATE AND PUBLIC CONSTRUCTION: 1929 TO 1946

[Represents value of work put-in-place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. Annual estimates, 1915–28, comparable with data below, available in Office of Domestic Commerce, Bureau of Foreign and Domestic Commerce)

#### [In millions of dollars]

Estimates of new private nonfarm residential construction prepared by Bureau of Labor Statistics.
 Public industrial building not segregable from private construction in 1929-1932.

Source: Estimates of new construction for 1939-46 are joint estimates of Dept. of Commerce, Bureau of Foreign and Domestic Commerce, and Dept. of Labor, Bureau of Labor Statistics; other data except as indicated in note 1, are estimates of Bureau of Foreign and Domestic Commerce. Current estimates are published monthly in the Industry Report on Construction and Construction Materials and Survey of Current Business.

### No. 871.-New Dwelling Units in Nonfarm Areas, by Type: 1920 to 1946

[Figures are estimates covering construction of all new family dwelling units in nonfarm area of United States, based upon building-permit reports. This area consists of all urban and rural nonfarm places. Urban designation is applied to all incorporated places with a population of 2,600 or more in 1940, and, by special rule, to a small number of unincorporated civil divisions. Rural nonfarm construction includes all construction for non-agricultural use in unincorporated areas and incorporated places of less than 2,500 population. Hence, urban construction is classified by location, whereas rural nonfarm construction is classified according to the intended use of individual buildings]

2 Includes \$45,189,000, estimated cost of 8,027 dwelling units built by New York City Housing Authority.

Includes 1- and 2-family dwellings withestores.
 Includes multifamily dwellings with stores.

Source: Department of Labor, Bureau of Labor Statistics; annual and current data are published in monthly releases and Monthly Labor Review.

Exclusive of hangars and other buildings. Included in miscellaneous.
Includes all contracts awarded by Resettlement Administration for residential construction, except for 3 large suburban developments.

Includes work under jurisdiction of Public Roads Administration.
 Includes forestry and railroad construction and repair projects.

Source: Department of Labor, Bureau of Labor Statistics; 1935-43 from annual reports on building construction; subsequent data published in monthly releases and in Monthly Labor Review.

No. 874.—Construction Contracts Awarded in 37 States—Value of Construction and Floor Space of Buildings, by Class of Construction: 1927 to 1946

[For State figures, see table 875. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1933 and previous issues of the Statistical Abstract. Figures for the individual States and districts in table 875 represent the value of construction contracts awarded in the States and districts where the work was actually done]

[Values in millions of dollars; floor space in thousands of square feet]

YEAR	Total	Resi- den- tial	Com- mer- cial <sup>1</sup>	Manu- factur- ing build- ings <sup>2</sup>	Public works	Public utili- ties 1 2	Edu- ca- tional	Hos- pital and insti- tu- tional	Public build- ings	Re- ligious	Social and recrea- tional	Mis- cella- neous non- resi- den- tial

### No. 876.—Construction Contracts Awarded—Indexes of Value: 1920 to 1946

[1923-25 average=100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. For more detailed description of indexes, see Federal Reserve Bulletin for July 1931]

## No. 877.—Engineering Construction Contracts Awarded—Volume, by Type: 1925 to 1946

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs through 1945 (except for 1932-35): Waterworks, excavation, drainage, and irrigation, \$15,000; other public works, \$25,000; industrial buildings, \$40,000; other buildings, \$40,000. For 1946, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1932-35, minimums used were: \$10,500, \$17,500, \$28,000, and \$105,000]

Preliminary.
 Classified as urban under special rule by Bureau of the Census, 1940.
 Figures represent applications filed.
 Not available.
 Data for 1942-44 represent applications filed, but have been adjusted to eliminate large projects identified as representing post-war plans. Data for 1945 and 1946 represent work actually started, based on inspections instead of on applications filed, as in previous years.

Source: Department of Labor, Bureau of Labor Statistics: 1942-43 from annual reports on building construction; subsequent annual and current data for cities of 100,000 or more published in monthly releases; data for cities 50,000 to 100,000 from records not published elsewhere.

No. 880.—Construction and Building Cost Indexes: 1918 to 1946

[1913-100 except Aberthaw for which base year is 1914. For Bureau of Labor Statistics index of building material prices, see pp. 287 and 288]

<sup>&</sup>lt;sup>1</sup> American Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, brick-steel frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available for individual cities. Recently revised to include adjustments for social security taxes, unemployment insurance and corresponding "overhead."

Source: Engineering News-Record, New York, N. Y.: Apr. 17, 1947 issue.

individual cities. Recently revised to include adjustments for social security taxes, unemployment insurance and corresponding "overhead."

Associated General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. Wages, prevailing rates for hod carriers and common labor. Materials, weighted: Sand, gravel and crushed stone, I; coment, I; immber, I; hollow tile, ½; structural and reinforcing seel. ½.

Engineering News Record construction cost index has 4 components: (1) Structural steel shapes, hase price; (2) cement at Chicago; (3) lumber, which until 1935 was 12 x 12 long leef yellow pine wholesale at New York, and since 1935 is 2 x 4848 pine and fir in carload lots, ENR 20-cities average; (4) common labor, ENR 20-cities average; (4) common labor, ENR 20-cities average; (5) common labor. ENR 20-cities average; (4) common labor, ENR 20-cities average; (5) common labor construction cost index is designed to predict changes in construction cost index has been used widely to apply to any specific class of construction or to a particular locality. ENR Building Cost index: In practice, the construction cost index has been used widely to apply to building costs, and when common and skilled labor rates move in similar trends it is a satisfactory measure of relative building cost movement. However, following the low wage rates of 1922, common labor climbed much faster than skilled and reached new all-time highs by July 1937. The increase was in the lower ranges between union and nonunion. When "prevailing" wages became synonymous with union wages the gap closed up, hence the ENR 20-cities wage average increased more rapidly than the union rates. To provide a more representative measure of building cost movement, the skilled labor trend has been substituted for the common labor trend in the ENR Construction Cost index, and the ENR Building Cost index computed.

E. H. Borckh & Assoc, Inc. Individual series for 10 types of buildings for 16 areas. Weights based on studies of actual building cost

### No. 881.—Materials Consumption for New Construction: 1944 and 1945

[Data represent estimated quantities of materials required by construction activity, both public and private, in the United States. They are divided into 4 major categories: (1) Military, which covers army and Navy establishments, camps, cantonments, hospitals, airfields and bases, storage facilities, etc. (2) Plant expansion, which includes the construction of industrial plants engaged in the production of ships, aircraft, and other war materials, (3) Housing, which represents civilian, nonmilitary housing, and (4) All other nonmilitary construction such as schools, hospitals, commercial establishments, streets, roads, sewer and water development, farm construction, and utilities. Estimates do not include materials consumed in the manufacture of machines, machine tool and processing equipment!

No. 888.—Building Costs, Small-House—Indexes: 1936 to 1946

[Average menth of 1935-39—100. This index is a 3-month moving average of cost estimates for building a standard 6-room frame house. Data have been revised to reflect a new system of data collection utilizing Bureau of Labor Statistics facilities. See source publication for discussion of old and new concepts]

## No. 884.—Construction—Summary, by Kind of Contractor, by Size Groups: 1939

[The 1939 Census of Construction covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes, on projects located within the limits of continental United States. It included erection and installation departments of manufacturers and merchandisers, when it was an important but not necessarily major portion of their business enterprise. Force-account work, ship and boat building, and installation and servicing of domestic appliances were not included. "Work performed" represents contract or order value of work done by the contractor's or builder's own forces. Work sublet to others was not included as work performed in the report of the builder or general contractor, but was reported as part of the business of the special strade contractor who received the subcontract. "Construction work" includes alterations and repairs, as well as new construction and additions. Data for establishments reporting less than \$500 of work performed in 1939 are not included. The can wass is known to have been incomplete in coverage of small contractors who operated from their homes. Most of this shortage occurred in metropolitan districts. It is believed that this undercoverage affects materially only number of establishments and number of proprietors]

# No. 888.—Construction—Summary for Establishments Reporting Business of \$25,000 or More, by States: 1929 and 1939

[1920 and 1930 comparisons must be limited to establishments reporting business of \$25,000 or more as the 1920 census covered only that sise group. That sise group in 1930 accounted for 77 percent of total value of work performed by all contractors and builders regardless of sise. Geographic distribution is based on office address of reporting establishment, not location of construction project]

## No. 895.—Dwelling Units, Urban and Rural—Occupancy and Tenure, by Average and Median Monthly Rent: 1940

[For urban and rural-nonfarm units, monthly rent includes land; for farm units, farm land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of reported value]

## No. 896.—Dwelling Units, Urban and Rural—Estimated Total Monthly Rent and Estimated Total Value: 1940

[For urban and rural-nonfarm units, monthly rent and value include land; for farm units, farm land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of reported value. Value of owner-occupied units represents the owners' estimate of the value. For tenant-occupied and vacant units value was estimated as 100 times the monthly rent. Value or rent of units for which these data were not reported was estimated by assuming that the average value or rent of such units was the same as the value or rent of reporting units in the corresponding tenure and occupancy group of the urban and rural areas of each region]

No. 900.—Dwelling Units, Urban and Rural-Nonfabm—Median Contract or Estimated Monthly Rent and Median Value, by Tenure: 1940

[Monthly rental data include contract rent of tenant-occupied units and estimated rent of owner-occupied and vacant units. Figures for "All dwelling units" include vacant units. Median defined: That item which is in the middle of a series arranged according to sise. Thus, the median rent is the rent which divides the total number of dwelling units into two equal groups, one having rents higher than the median and one having rents lower than the median

<sup>&</sup>lt;sup>1</sup> For definition of median, see headnote, table 900.
<sup>2</sup> Mortgage data are limited to owner-occupied nonfarm units in structures without business and containing not more than 4 dwelling units; percent represents percent of reporting owner-occupied units which were mortgaged. For number of owner-occupied urban and rural-nonfarm units, see table 897.

No. 910.—Dwelling Units, Urban and Rural—Occupied Units With 1.51 or More Persons per Room, by States: 1940

[Excludes units not reporting on number of persons per room. For total number of occupied units, see table 804]

### 29. Manufactures

Census of Manufactures.—The basic source of comprehensive data on manufacturing production has been the Census of Manufactures conducted by the Bureau of the Census. This census was taken decennially from 1849 to 1899, for each fifth year thereafter through 1919, and biennially from 1921 through 1939. During the recent war years the Census of Manufactures was abandoned as directed by Executive Order No. 9152 in the interests of more important work related to the Nation's war effort.

The quinquennial censuses—those of 1904, 1909, 1914, and 1919—covered all factories or plants whose products were valued at \$500 or more, but beginning with 1921, the minimum limit has been \$5,000. Conceptually an establishment is a geographically isolated manufacturing unit maintaining independent bookkeeping records, regardless of its managerial or financial affiliations. An establishment—which may be a single plant or a group of closely located plants operated by a single plant or a group of closely located plants operated by a single company without separate records for each—is the basic reporting unit. In addition, the establishment is the basic unit of industrial classification, being assigned to an industry on the basis of its reported product of chief value.

"Value of products" represents the selling value at the plant or factory. Because of the use of the products of some establishments as materials for others, the total cost of materials and the total value of products for all industries in a given group, and for all groups in the aggregate, include much duplication, estimated at roughly one-third of the gross value of products. Such duplication is not, however, found to any great extent within individual industries. "Value added by manufacture," computed by subtracting "cost of materials, supplies, fuel, etc.," from value of product, provides a rough measure of [the contribution of manufacturing processes to product values and is practically free of duplication.

Detailed quantity and value data on the output of manufactured products are compiled from reports of the Census of Manufactures. The "total value" figures for a group of products differ from the "value of products" of the corresponding industry as given in table 923. The product figures include the minor or secondary production of the commodity in plants engaged primarily in other lines of manufacture, whereas the industry figures which relate to the total output of a group of plants primarily engaged in a particular industry, include the value of the secondary products made by the plants classified in the industry.

Because the Bureau of the Census is prohibited from disclosing the operations of any individual company, general plant and detailed commodity information for any industry can be published only where a given industry in a given State or area is represented by three or more independently owned establishments of approximately the same size. This restriction has little effect upon tables for the entire United States, but there are many instances where because of the concentration of production in a few establishments, it has been necessary to combine data for presentation, rather than showing detailed industry data for each city and State.

I say some say make the section relate to continental United States areas as a superior of the section relate to continental United States

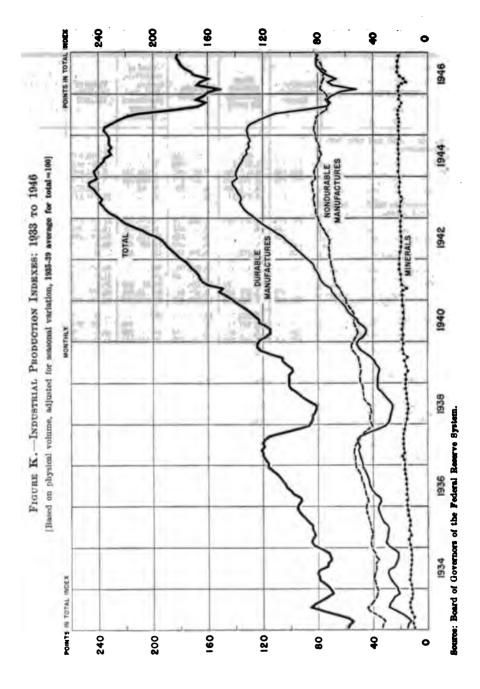

### No. 915.—MANUFACTURES—SUMMARY: 1849 to 1939

[It is sometimes necessary, for various reasons but chiefly because of changes in census classification, to make adjustments in figures for earlier census years. Adjustments have been made in figures beginning with 1899 as a result of exclusion from Census of Manufactures since 1929 of the industries "Coffee and spice, reasting and grinding," "Flax and hemp, dressed," "Gas, illuminating and heating," "Grindstones," "Motion pictures, not including projection in theaters," "Peanuts, walnuts, and other nuts, processed or shelled," and "Railroad repair shops" (both steam and electric)]

<sup>1</sup> Value of products less cost of materials, containers, fuel, and purchased electric energy.
2 For all establishments having products valued at \$500 or more.
3 Reduced to gold basis.
4 For all establishments having products valued at \$5,000 or more.
5 Includes cost of contract work.
6 Calculated by subtracting sum of cost of materials, containers, fuel, purchased electric energy, and cost of contract work from value of products. Not strictly comparable with years prior to 1935.
7 An establishment operating two or more factories was counted as two or more establishments in censuses for 1937 and 1939. Total number was increased approximately 2,000 by this ichange.

	297, 166	2, 913, 463	6, 647, 238	12, 050, 369	16, 078, 234

Because of change from \$500 to \$5,000 in minimum-value-of-products limit, "Number of establishments reporting power equipment" figures for 1919 and earlier years are not comparable with those for 1929 and 1939. This change did not, however, materially impair comparableness of figures for other items in this table.

Returns for "Logging camps and logging contractors (not operating mills)," numbering 967, were excluded from power tabulations.

Includes 47,192 horsepower reported as other owned power, not distributed by type of prime mover.

Includes 28,213 horsepower reported as other owned power, not distributed by type of prime mover.

Figures for "Steam engines" include data for "Steam turbines," not reported separately.

Figures for "Other internal-combustion engines" include data for "Diesel and semi-Diesel engines," not reported separately.

reported separately.

Includes data for water motors. Not available.

## No. 922.—Industrial Power Requirements of Manufacturing and Extracting Industries: 1939 to 1946

[Based on reports filed by more than 5,000 manufacturing, industrial, and other establishments consuming over 85 percent of the total energy used by such establishments. Use for 1946 was estimated. Data have been adjusted to census coverage based on 1939 Census of Manufactures and 1939 Census of Mineral Industries]

#### [In millions of kilowatt-hours]

No. 928.—Manufactures—Summary for Industry Groups, 1929 to 1939, and for Subgroups and Industries, 1939

[Figures do not represent exactly numbers of wage earners, values of products, etc., assignable to classes of commodities from which industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufactures two or more classes of commodities. See also general note, p. 311.

GROUP OR INDUSTRY	Cen- sus year	Num- ber of estab- lish- ments	Wage earners (average for the year)	Wages (\$1,000)	Cost of materials, etc., fuel, purchased energy, and contract work (\$1,000)	Value of products (\$1,000)	Value added by manufac- ture (\$1,000)1

Cotton broad woven goods. Cotton narrow fabrics. Cotton yarn. Cotton thread.	1939 1939 1939 1939	661 163 349 75	312, 249 13, 318 70, 452 13, 298	226, 175 11, 776 45, 055 10, 529	481, 028 22, 934 114, 741 26, 695	869, 354 48, 501 198, 940 51, 376	438, 331 25, 566 84, 199 24, 681

Value of products less cost of materials, containers, fuel, purchased electric energy, and contract work.
 Excludes cost of contract work.
 No comparable figure available as the internal-revenue tax is included in value of products but not in cost of materials, etc.
 No comparable figures available for 1929 and 1935.

Value of products less cost of materials, containers, fuel, purchased electric energy, and contract work.
 Excludes cost of contract work.
 1637 figures shown in italics are comparable with statistics for 1939 and include data for 3 establishments which were originally classified in another group for 1937 and previous years but which have now been reclassified in this group. Roman-type figures for 1937 do not include data for these 3 establishments and are comparable with statistics for earlier years.

Includes data for Hawaii for all years and data for Puerto Rico beginning with Aug. 1, 1928.

3 Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.

3 Through 1930, includes rum and apprits produced at distilleries for denaturation. 1933 through 1941, represents withdrawais of alcohol only for denaturation. 1942 through 1946, represents all products used for denaturation which were regarded, upon receipt at denaturing plants, as alcohol, whether originally produced as alcohol by industrial alcohol plants or as spirits or unfinished spirits by registered distilleries.

4 Prior to 1943 includes denatured rum.

3 Represents gross production. Net production—that is, gross production minus products used in redistillation—was 419,566,569 proof gallons for 1942, 364,669,976 proof gallons for 1943, 590,929,045 proof gallons for 1944, and 650,089,874 proof gallons for 1945.

Includes champagne, other sparkling wines, and artificially carbonated wines.
 Tax is payable on each ½ pint or fraction thereof in each bottle or container.

## No. 930.—Tobacco, Leaf—Amounts Consumed in the Manufacture of Cigars, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

[All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigareties was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1898 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely, "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses]

<sup>&</sup>lt;sup>1</sup> Barrels of not more than 31 wine gallons. <sup>3</sup> Excludes ethyl alcohol.
<sup>3</sup> A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.
<sup>4</sup> Excludes high-proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.
<sup>5</sup> Includes ethyl alcohol.
<sup>6</sup> Excludes were proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.
<sup>6</sup> Excludes were proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.

Excludes vermouth.
 Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1946, 260,240,000 gallons of distilling materials were Produced.

Standard United States gallon.
Excludes distilling materials.

No. 931.—Tobacco Products—Production, by Kind: 1901 to 1945

[Compiled from monthly returns of manufacturers. Data relate to products manufactured in continental United States, excluding those manufactured in Customs bonded manufacturing warehouses, class 6. There were 98,891,710 Jarge cigars manufactured in these warehouses in 1945. Large cigars are those weighing more than 3 pounds per thousand]

<sup>1</sup> Active cotton spindles represent sum of greatest number reported by each mill as active at any time during year regardless of length of time operated. Spindles consuming cotton mixed with other fibers represent total number reported as producing cotton blends at any time during year. Collection of these data were discontinued at close of reporting period, July 31, 1945. Beginning Aug. 1945, data on number of cotton spindles active last day of each 1. onth by type of fiber spun were collected. On July 31, 1946, there were 21,578,000 spindles active on cotton, 575,000 on spindles active on cotton, 16,869,000 were in "Cotton-growing States," 4, 173,000 in "New England States," and 331,000 in "Other States."

2. Includes linter for 1840 to 1908. Figures for all years include foreign and domestic cotton.

Source: Dept. of Commerce, Bureau of Census; annual report, Cotton Production and Distribution.

<sup>93,000</sup> in "Other States,"

2 Includes linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.

2 Not available. 4 Cotton mills only.

3 Includes tooks held in public storage and at compresses beginning 1938.

4 Includes linters for 1908 to 1908. 7 Average, 1909 and 1910.

4 "Upland" includes "American-Egyptian" beginning 1912 (first year produced). 4 Less than 800 bales.

No. 934.—Cotton Spindle Activity, 1944, 1945, 1946, and Cotton Consumption, 1942 to 1946, by Region and State

[Years ended July 31. Consumption includes domestic and foreign cotton and is in running bales counting round as half bales, except foreign cotton which is in equivalent 500-pound bales]

## No. 986.-Wool Manufacturing Equipment, by Type: 1899 to 1943

[Represents equipment in possession of wool manufacturing establishments, regardless of condition. 1943 data based on reports of machinery "in place," and include estimates of number in possession but not in place. Data for 1899, 1914, and 1929 reported in Census of Manufactures, and exclude mills whose product was valued at less then \$500 in 1899 and 1914, and less than \$5,000 in 1929; 1943 inventory included all mills, regardless of size]

<sup>2 1943</sup> and other years not strictly comparable. Census of Manufactures for 1899, 1914, and 1929 called for a report on looms from those mills whose principal products were wool and hair goods while 1943 inquiry covered all mills consuming weaving years spun on woolen or worsted spinning spindles. Includes pile fabric looms conforming with these definitions.

COTTON 849

# No. 938.—Cotton Manufactures—Production by Kind: 1939 to 1946

Data for 1941-46 collected to meet requirements of war agencies; not strictly comparable with Census of Manufactures for 1939. 1946 data preliminary

Data collected in 1939 Census were published in square yards, although the major fabric classifications included
data in terms of linear yards.
 In the gray except blankets and blanketings. All figures for 1941-46 represent goods in the gray.
 Includes outing and interlining fiannels, canton fiannels, moleskin (heavy-filling sateens), duvetyns and

suede

Source: Department of Commerce, Bureau of the Census; 1939 from Biannial Census of Manufactures; 1941-46 compiled from manufacturers' reports to War Production Board and Civilian Production Administration and published in Facts for Industry Series 32-2.

suede.

4 Data for interlining fiannels, workshirt fiannels, moleskins and suede included with all other napped fabrics.

5 For production of wool-and-cotton mixed blankets and blanketing containing 25 to 98 percent wool, see table 942.

4 1939 data are for finished fabrics. 1941-46 are for goods in the gray.

7 Includes a small quantity of cotton and rayon blankets.

8 Data not available.

9 Includes blanketing.

10 Data for crib blankets not collected separately. Included with other blankets according to fiber content.

11 Includes fabrics containing 51 percent or more cotton by weight, balance rayon.

## No. 989.—Copion and Rayon Woven Goods, Bleached, Dyed or Printed: 1939 то 1946

Cotton fabric data for 1939 include cotton, linen and cotton-warp mixtures. Rayon fabric data include rayon and silk, including mixtures.
 Complete data for finishing rayon fabrics in 1941 are not available.
 Rayon fabrics are defined as fabrics containing 51 percent or more rayon by weight. Rayon means synthetic yarns made by viscose, cuprammonium and cellulose acetate processes. An unknown quantity of fabrics made from nylon and other synthetic fibers are also included in the rayon yardage.
 White finished rayon goods are included with rayon dyed goods.
 Includes roller, screen, flock and block printed fabrics.

## No. 941.—RAYON BROAD WOVEN FABRICS—PRODUCTION, BY TYPE: JULY 1943 TO DECEMBER 1946

[Data cover production of rayon broad woven fabries containing by weight 51 percent or more rayon. Fabrics reported are either 100 percent rayon or rayon mixtures containing 51 percent or more rayon with addition of cotton or other fibers. However, if wool fibers are added to extent of 25 percent or more, they are classed as woolen mixtures and are not included with fabrics listed. After Census of Manufactures for 1939, detailed data for this industry were not collected until 1943. These data were collected to meet requirements of war agencies and are not comparable with Census of Manufactures data]

[In thousands of linear yards]

## No. 942.-Woolen and Worsted Manufactures-Production, by Kind. 1939 TO 1946

(Woolen and worsted woven goods defined as fabrics containing by weight 25 percent or more wool fiber. Weel fiber means fibers as defined by Wool Products Labeling Act of 1939. Data beginning with 1942 not strictly comparable with those published in Census of Manufactures for 1939. Detailed information on military fabrics required by war agencies, and in most cases, collected by type of fabric rather than by end use. Consultations with military agencies provided basis for estimating end use of each type of fabric. Estimates occurred primarily in men's wear fabrics, and involved less than 15 percent of total apparel fabrics produced. Production figures of women's and children's wear fabrics collected by weight of fabric instead of end use. In Census of Manafactures for 1939 data collected from this industry on a square-yard basis; present series requires reporting of linear yards, with narrow fabrics converted to a 54-inch width. 1939 data converted to a 34-inch linear yard measure by dividing quantity of square yards by 1½, excepting blankets which were converted to a 73-inch linear yard measure by dividing quantities of square yards by 2]

<sup>1</sup> Measure used in 1939 was square yards; data converted to a 54-inch linear yard measure, excepting blankets which have been converted to a 72-inch linear yard measure. Data for 1942-46 on narrow fabrics converted by reporting companies to a 54-inch linear yard measure.

Includes data for military fabrics reported by types. Estimates as to end use classification made on less than 15 percent of total quantity of apparel fabrics.

2 Data for 1939 and for 1942 collected as to end use; 1943-46 data collected by weight of fabric.

4 Data not available.

Source: Department of Commerce, Bureau of the Census; 1939 from Biennial Census of Manufactures; 1942-46 compiled from manufacturers' reports to War Production Board and Civilian Production Administration and published in Facts for Industry Series M15H.

An unknown quantity of these fabrics included in the women's and children's wear classifications.
 Included in other nonapparel fabric classification.
 Includes data for papermakers' felts not collected separately for 1942.

<sup>&</sup>lt;sup>1</sup> The inclusion of "Books and pamphlets printed for publication by others," "Maps, atlases and globe covers made for others," "Greeting cards printed for others," "Newspapers and periodicals printed for publication by others," etc. results in duplication in the aggregate value and receipts, as follows: 1937, \$158,466,000; 1939, \$201,-627,000. (No separate data available for greeting cards for 1937.) These amounts represent receipts by commercial printers for work done by them for other printers or for publishers, and consequently enter twice into the aggregate value and receipts.

Includes "Pamphlets printed for publication by others."

No data

# No. 949.—CHANICALS—PRODUCTION, BY KIND, 1989 TO 1946

[Data for chemicals shown are restricted to a selected group comprised for the most part of inorganic chemicals and related products which are sufficiently important economically to justify publication. Data for production by Government-owned areanals, ordrance works, and certain plants operated for Government by private industry are excluded, except that data for chemicals manufactured by Tennessee Valley Authority are included.

1 Includes data for small amount of aqua ammonia reported by one company.

1 Inciddes data for small amount of adua ammonia reported by one company.
2 No comparable data.
3 Excludes by-product coke-oven production.
4 Not shown separately to avoid disclosure of individual operations.
5 Proportion of estimate, 5 percent.
6 Includes data for deodorizing, decolorizing, and water purification grades. Data for gas-mask solvent recovery Includes data for deodorizing, decolorizing, and water purification grades. Data for gas-mask solvent recovery grades excluded.
 Proportion of estimate, 3 percent or less.
 Includes data for molybdate chrome orange.
 About 1 percent of production represents data for pulp colors, and flushed and reduced chrome yellow.
 Proportion of estimate, 4 percent.
 Includes quantities diverted to manufacture of caustic soda and sodium bicarbonate and quantities processed to finished light and finished dense soda ash.
 Excludes quantities converted to finished dense soda ash.
 Collected in cooperation with Bureau of Mines.
 Excludes quantities later evaporated to solid caustic and reported as such.
 Includes sulfure acid of clump grades.

15 Includes sulfuric acid of oleum grades.

Source: Department of Commerce, Bureau of the Census; reports of Biennial Census of Manufactures.

Includes much duplication.
 Value of products less cost of materials, supplies, fuel, and purchased electric energy. Beginning 1935, deductions include, in addition, cost of contract work.
 No data.
 Includes data for 5 establishments in 1937 and 2 in 1939 engaged in production of sintered ore and flue dust and operated independently of blast furnaces.

## No. 966.—Iron and Street Castings—Shipments: 1943 to 1946

[In short tens. For malleable iron castings, data represent complete coverage. Data for gray iron casting represent approximately 93 percent (for pressure pipe and soil pipe, practically complete) coverage for 1944-46. For steel castings, data represent about 94 percent coverage for 1943 and 1944, and complete coverage for 1945 and 1946.

Includes skelp beginning 1922.

Merchant bars include concrete reinforcement bars and, beginning 1934, certain miscellaneous bars previously included in "All other finished rolled production."

Average for years 1887-90.

Average for years 1902-05.

Average for years 1902-05.

Small structural forms not included in 1911.

Average for period July 1, 1897, to Dec. 31, 1900.
Average for period July 1, 1903, to Dec. 31, 1905.
Small structural forms not included in 1911.

#### No. 970.—IBON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1945

[Covers products listed in table 971; excludes data for highly elaborated products of iron and steel. Wakes figures through 1931 exclude, and those beginning 1922 include data for small items for which quantity figures are not available. Ferromanganese data included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, excluded beginning with 1922]

[Quantities in thousands of long tons (2,240 pounds); values in thousands of dellars]

No. 973.—Magnesium—Production of Semifabricated Products: 1940 to 1946 [Thousands of pounds]

CLASS	1940	1941	1942	1943	1944	1945	1946
Total	5, 476	13, 675	1 55, 164	1 146, 262	1 213, 418	89, 770	15, 114
Castings: Sand. Permanent mold. Die Sheet, strip, and plate. Extrusions. Forgings.	3, 974 699 366 411 26	11, 945 768 485 451 26	32, 024 20, 387 1, 346 887 475 45	59, 123 81, 337 2, 866 1, 680 1, 029 227	75, 221 123, 904 2, 362 2, 308 9, 198 425	42, 471 39, 592 1, 689 2, 900 } 3, 118	7, 149 532 791 3, 411

At furnace after 1907.
 Bessemer billets prior to 1927.
 Average for 1898-1900.
 Average for week of Dec. 24, 1946.

Bessemer rails prior to Oct. 22, 1921.
 Muck iron in 1891.
 Beams prior to Mar. 19, 1929.
 Average for week of Dec. 25, 1945.
 Double refined iron bars.

Excludes extruded sheet stock, forging stock, powder, and sticks.
 Represents extrusions, including forging stock; forgings data not available.

<sup>&</sup>lt;sup>1</sup> Includes estimated production amounting to less than 1 percent.
<sup>2</sup> Includes 84,338 pounds of copper water tubing.

## No. 975.—Nonperrous Metals and Alloys, and Finished Products thereop-PRODUCTION, BY KIND: 1935, 1937, AND 1939

[Covers products made for sale and interplant transfer, excluding those made for consumption in same works. Data represent production of commodities specified, whether made as primary or as secondary products by industries reporting them. Census designations of industries in which these commodities are made are as follows: "Alloying; and rolling and drawing of nonferrous metals, except aluminum"; "Secondary smelting and refining of nonferrous metals, not elsewhere classified"; "Nonferrous metal foundries (except aluminum)"; and "Nonferrous metals product not elsewhere classified." No data are included for production of copper, lead, sinc, and other nonferrous metals from the ore nor of secondary metals by establishments engaged in primary smelting and refining of nonferrous metals]

## No. 977 .- Machinery-Value of the Principal Classes Manupacyured

[In thousands of deliars. The various classes of machinery listed are products of a number of industries, such as "Industrial machinery, not elsewhere classified," "Motor vehicles, motor-vehicle bodies, parts and accessories," "Agricultural machinery (except tractors)," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this Abstract such as tables 978 and 982]

CLASS	1929	1933	1935	1937	1939
Agricultural machinery	167, 673	17, 109	68, 916	114, 340	96, 207
Agricultural machinery Aircraft (begun and completed within year)	52, 157	15, 860	17, 454	38, 664	75, 87
Bakers' machinery and equipment	21,730	7, 332	11, 869	18, 120	17, 583
Blowers and fane	25, 243	6,955	15, 830	26, 282	1 24, 563
Blowers and fans	11, 082	9, 157	8, 264	21, 135	11, 956
Canning machinery	8, 535	3, 139	8, 271	11, 840	4, 100
Cash registers, adding, calculating, and card-tabulating	151, 583	46, 577	1 83, 217	118, 552	
machines, and typewriters Cement and concrete machinery (not including cement-	1.00	224			95, 712
making, etc.)	4, 132 4, 387	545	1,809	4, 053	1,739

Electrical products not elsewhere classified		58, 732	100, 451	85, 928

<sup>1</sup> No data.

Source: Department of Commerce, Bureau of the Census; reports of Biennial Census of Manufactures.

<sup>1</sup> No data.
2 Includes porcelain and trolley-line insulators for 1937 and earlier years.
3 Includes automotive generators for battery charging; for 1937 and 1939, data are included in "Automotive electrical equipment" industry.
4 Includes radio transformers; for 1935, 1937, and 1939, data are included in radio apparatus in "Communication equipment" industry.
5 Includes motors which in later years are included in other motors and parts and supplies.
6 Includes motors not reported by kind. See note 5 also.
7 Other motors only; parts and supplies included with automotive starter motors in "Automotive electrical equipment" industry.

8 New note 3.
4 Automotive starter motors and supplies for other motors, see note 7.
11 Includes X-ray tubes; for later years data are included in nonradio electronic tubes and X-ray tubes in "X-ray and therapeutic apparatus and electronic tubes" industry.
10 Includes Defongraphs for electrical reproduction of records, included in prior years in "Other."
11 No data for radio parts. See note 4 also.
12 Includes parts and supplies.
13 Resurse: Department of Commerce Bureau of the Commerce of Blanniel Consum of Manufactures.

# No. 979.—FARM MACHINES AND EQUIPMENT (COMPLETE UNITS, ATTACHMENTS AND PARTS)—SALES, BY CLASS: 1943 TO 1946

[In thousands of dollars. Excludes data for tractors for nonfarm use]

Data incomplete or no comparable data.
 Excludes number for hand-feed milling machines for which a value of \$129,000 was reported.

# No. 988.—Air Conditioning and Commercial Reprigeration Equipment— Shipments by Manufacturers: 1940 and 1944

[Value figures in thousands of dollars. Statistics cover types normally sold as standard items and more important types of components and accessories. Data include a very limited amount of certain types specifically designed for special uses. Excluded are less important components and accessories such as switches, dehydrators, accumulators, valves, and surge drums and tanks. Companies included account for approximately 99 percent of the total value of equipment shipped during 1944]

Number of absorption systems not included in total.
 Not requested for 1940.
 Excludes coin-operated equipment, which is included in miscellaneous.
 Not shown separately to avoid disclosing operations of individual companies.
 Included in data for self-contained units to avoid disclosures.
 Includes export shipments, not shown separately.

#### No. 984.--Motion-Picture Production-Summary: 1921 to 1989

all money figures are in thousands of dollars. Represents activities of motion-picture studies and laboratories. Excludes distribution of films and their projection in theaters. No data included for establishments which reported less than \$5,000 as cost of work done. The motion-picture industry has been canvessed, since 1921, in connection with the Biennial Census of Mannfactures. It is not, however, a manufacturing industry, but was [All m treated as such prior to 1931]

Source: Department of Commerce, Bureau of the Census; Biennial Census report, Motion Pictures,

<sup>&</sup>lt;sup>1</sup> Includes cost of studio supplies, containers for films, fuel, and purchased electric energy.

<sup>2</sup> Data cover "productive employees" only. These include all wage carners and a part, but not all, of the salaried employees. Figures are not, therefore, comparable with either the wage-earner figures or with the total number of persons engaged. Data for other years cover all classes of employees.

<sup>3</sup> Does not include data for salaried officers of corporations.

Data incomplete.

"News reels" included with "advertising."

"News reels" included in that for "other films."

Combined to avoid disclosing approximations of data for individual establishments.

## No. 985.—Alaska—Manufactures, by Industries: 1899 to 1939

[Figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in minimum value-of-products limit resulted in some reduction in "Number of establishments" reported as compared with what it would have been had minimum of \$500 been retained, but did not seriously impair comparableness of figures for 1939 with those for earlier years. Comparable figures for earlier years are given for all industries for which such figures are available]

roducts.

11 This figure is inflated to the extent to which it includes amounts paid for outside work.

12 Products of planing mills not reported in conjunction with sawmills.

13 Books, 1 establishment; job printing, 40; photoengraving, 1.

14 Brick and hollow structural tile, 2 establishments; sewer pipe, 1; other concrete and stone products, 3.

15 Awnings, 1 establishment; hats, felt and linen, 2; hats, straw, 4; hosiery, full-fashioned, 1; rugs, string, 1; rugs,

Source: Department of Commerce, Bureau of the Census; Reports of Census of Manufactures, 1939.

<sup>1</sup> Value of products less cost of materials, supplies, containers, fuel, purchased electric energy, and contract work.

3 Figures include data for coffee eleaning and polishing, which is now treated as an agricultural activity and therefore was not covered by the 1939 Census of Manufactures.

2 Except "Liquors, mait," and "Foods, miscellaneous." See footnote 16.

4 The figures for this industry do not include data for sugar-cane plantations.

5 Household furniture, 40 establishments; mattresses, 2; office furniture, 1; show cases, 2.

6 Footwear, except rubber, 9 establishments; leather, tan, 1; saddlery, 1; other goods, 1.

7 Aluminum products, 1 establishment; ornamental ironwork, 3; sheet-metal work, 3; tin cans, 3; watch parts, 1.

8 Reported as "Foundry and machine-shop products."

9 Estimated in part by use of ratios derived from reports made for corresponding classes of establishments operated in the United States.

10 As part of the establishments engaged in contract work reported receipts for work done on materials owned by others, and part reported actual values of goods made, all returns have been converted to estimated value of products. products.

is Bus bodies, 1 establishment; buttons, pearl, 2; compressed and liquefied gases, 2; cottonseed oil and meal, 1; diamond cutting, 1; foods, miscellaneous, 5; liquors, malt, 2; matches, 1; novelties, mahogany, 1; oxcarts and truck bodies, 1; paperboard containers, 1; salt, 1; signs, neon, 1; soap, 2; tires, retreading, 1; trunks, 3.

No. 988 .- PATENT APPLICATIONS AND PATENTS AND CERTIFICATES OF REGISTRA-TION ISSUED SINCE INITIATION OF THE PATENT SYSTEM: 1836 TO 1946

[Number of patents granted prior to July 28, 1836, was 9,957. Data include patents issued to citizens of United States and residents of foreign countries]

<sup>|</sup> Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees.
| Data are for period from July 28, 1836, to Dec. 31, 1830, except as otherwise specified.
| Data are for 11 years beginning 1840; records prior to this date are not available.
Data are for 8 years beginning 1843.	Data are for 13 years beginning 1838.	
Data are for the year 1870.	Data are for 7 years beginning 1874.	
Registration of labels suspended from May 27, 1891, to June 9, 1896.	Data are for 8 years; first print registered Mar. 7, 1892.	Data are for the year 1928.
Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 991.)

## 30. Foreign Commerce of the United States

All foreign trade statistics in this section were compiled by the Department of Commerce, Bureau of the Census beginning May 1941. Prior to that time the statistics were compiled by the Bureau of Foreign and Domestic Commerce. statistics on foreign trade appear in the report. Foreign Commerce and Navigation of the United States, and monthly data appear in the Monthly Summary of Foreign Commerce of the United States. Except as noted (as, for example, in table 1020) the values stated are in United States dollars without reference to changes in the gold (The statutory price of gold—\$20.67 per ounce—in effect prior content of the dollar. to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted. is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 1000). Other explanations of the trade tables are given in the introduction to the annual report, Foreign Commerce and Navigation of the United States.

No. 992.—Foreign Trade of the United States—Summary: 1931 to 1946

[In thousands of dollars. For calendar years] 1921-193K 1936-1940. 1941-1945. ITEM 1942 1944 1945 1 1946 1 average **AVEFACE** average Merchandise: 2,025,195 1,988,914 Exports (incl. reexports).... <sup>&</sup>lt;sup>1</sup> Unilateral transfers indicate amount of contributions in kind or in cash thru Lend-lease, U. N. R. R. A., personal and institutional remittances, and similar channels. Thus, payments or receipts under unilateral transfers in most cases offset exports or imports, respectively, of goods and services for which present or future compensation is not required.

## No. 994.—Exportable Goods, Production and Proportion Exported: 1909 to 1946

[Agricultural production is gross income, excluding feed, seed, and waste. Manufactures represent value added by manufacture—census data through 1939 and approximations thereafter. Value of mine products in 1909, 1919, and 1939 are census figures, in 1929 census data plus petroleum products, and in other years, estimates based on data of Bureau of Mines. Freight receipts represent receipts of steam railroads through 1927; of steam railroads, motor carriers of property (estimate), and pipelines thereafter. As the figures are not adjusted for price changes, the increase or decrease in absolute values from period to period should be disregarded]

[Amounts in millions of dollars]

YEAR	Total	Agricul- tural products	Manufac- tures	Mining	Freight receipts	Exports, U. S. mer- chandise	Percent of total

## No. 995.—Exports and Imports of Merchandism: 1791 to 1946

[In thousands of dollars. For basis of dollar values, see general note, p. 887. Figures are for fiscal years ended Sept. 30, 1791 to 1842, and June 30, 1843 to 1915; calendar years thereafter. For calendar years 1900–15 and fiscal years 1930–46, see table 997. For total exports and imports by years prior to 1904, see table 998. Figures include gold and silver prior to 1821]

<sup>&</sup>lt;sup>1</sup> Includes gold and silver prior to 1821.

# No. 999.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1946 [Export figures for 1791 to 1830 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in table 906. Import figures for 1791 to 1820 are based on general imports shown in table 905, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in table 1023]

### No. 1000.—Merchandise Trade of Continental United States With Foreign COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS: 1903 TO 1945

MPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the United States customs area with all foreign countries, including the Philippine Islands and prior to 1925, the Virgin Islands. The U. S. customs area comprises continental U. S., Alaska, Hawaii, Puerto Rico, and during 1935 through 1939, the Virgin Islands. Trade between continental U. S. and the territories mentioned as part of the customs area are therefore excluded from these data. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States Territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying area. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 20 through 1918; thereafter, for years ended Dec. 31.

# No. 1007.—Exports of U. S. Merchandise and Imports—Indexes of Changes in Quanity, Unit Value (Price), and Total Value: 1913 to 1946

[Quantity and unit value indexes have been constructed by so-called "ideal formula," essential feature of which is use of quantities of several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in direct calculations for both exports and imports. It was then assumed that prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by computed price index, was included in aggregative totals from which quantity index for each class was calculated. Index of quantity and unit value of total exports and imports was based on aggregate of adjusted totals of classes. In constructing indexes, data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. Resulting year-to-year percentages were made into a series by chain method]

# No. 1010.—Exports of United States Merchandise—Value of Selected Articles: 1821 to 1945

[For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 887. Export figures for those years are mixed gold and currency values. Figures are for fiscal years ended Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

<sup>&</sup>lt;sup>1</sup> Excludes inedible fish oils. Excludes "lard compounds" beginning 1921; now classified as "vegetable cooking

fats."

A verage for period July 1, 1915, to Dec. 31, 1920.

July to December.

Includes semimanufactures. Source: See general note, p. 887.

#### No. 1011.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 TO 1945

[For basis of dollar values, see general note, p. 887. Figures represent "general imports" through 1933, "imports for consumption" thereafter, except as indicated. Figures cover fiscal years ended Sept. 30 through 1840, and June 30, 1850 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

#### [In thousands of dollars]

<sup>1</sup> Includes fur hats beginning 1921; formerly classified as miscellaneous textile products.
2 Includes sirups and maple sugar prior to Oct. 4, 1913. Includes semimanufactures.
3 Average for period July 1, 1915, to Dec. 31, 1920.
4 "General imports" through 1932; "imports for consumption" thereafter.
5 July to December. 7 Imports for consumption; see headnote.
5 Saltpeter transferred to fertilizers from chemicals beginning 1921.

No. 1012.—Foreign Trade With Each Continent, by Economic Classes: 1931 to 1944

[In millions of deliars. "Manufactured foodstuffs" includes beverages]

Exports, U. S. merchandise   1,985, 9, 166, 5   3,934, 2   5,019, 9   5,003, 6   12,841, 5   14,101, 5   2,096    Exports, U. <sup>&</sup>lt;sup>1</sup>As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on the basis of imports for consumption, as shown in table 1023.

<sup>2</sup> Less than \$500.

<sup>3</sup> Duties less cost of collection are turned into the Islands Treasury; excluded from totals.

<sup>4</sup> Excluded from totals; not part of U. S. Customs area, assessed under Tariff law of V. I.

<sup>5</sup> Formerly San Antonio, changed to Laredo, effective Dec. 22, 1939.

<sup>6</sup> Iows included with Chicago, beginning Sept. 23, 1939.

<sup>7</sup> Omaha included with Chicago in 1945.

No. 1020.—Exports (Including Reexports) and Imports of Merchandise, by Groups of Customs Districts: 1860 to 1945

[In thousands of dollars. For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 887. Export figures for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Figures cover fiscal years to and including 1915, calendar years beginning 1916. Import data are "general imports" through 1833; "imports for consumption" thereafter. Exports and imports of the interior districts, a small percentage of the total, are not included in this table]

<sup>&</sup>lt;sup>1</sup> Period July 1, 1915, to Dec. 31, 1920.

No. 1021.—Exports (Including Reexports) and Imports of Merchandise, by Principal Customs Districts: 1860 to 1945

[In these ands of deliars. For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 887. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1918; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that data some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Guffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively)

### · No. 1028.—Imports Entered for Consumption and Duties Thereon: 1821 to 1944

[For basis of dollar values, see general note, p. 887. From 1821 to 1866, inclusive, figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. "Ratio of duties to total" is based upon values of imports shown in table. Figures cover fiscal years ended Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter]

No. 1024.—Imports of Merchandise, Free and Dutiable, and Percent Free, by Economic Classes: 1821 to 1945

[In thousands of dellars. For basis of dellar values, see general note, p. 887. Figures cover flacal years ended Sept. 30, 1821 to 1840, and June 30, 1830 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1933; "imports for consumption" beginning 1934. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because, for 1922 to 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. For adjusted figures see table 492 of 1935 issue of Statistical Abstract]

Iceland included in Northern North America.
 Includes Luxembourg in 1942.
 For changes in geographic basis of statistics in 1939, see note 8 on table 1018, p. 915.
 Less than \$300.
 Includes Soviet Union in Asia.

#### 31. Commerce of Territories and Possessions

All statistics in this section, except as noted, were compiled by the Department of Commerce, Bureau of the Census beginning May 1941. Prior to that time, the data were compiled by the Bureau of Foreign and Domestic Commerce. These statistics are published in the Monthly Summary of Foreign Commerce of the United States. In the general foreign trade statistics in the preceding section, the Virgin Islands is treated as a foreign country prior to 1935 and its trade with the United States is included while its trade with other countries is not included. On the other hand, Alaska, Hawaii, and Puerto Rico, and for 1935–39, the Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included. Each of these territories appears as a separate customs district, but beginning with 1940, trade of the Virgin Islands has been excluded from the merchandise export and import figures. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and the United States are included in the general tables on foreign trade. See also table 1000, p. 894.

The tables in this section present the total foreign trade of each of the U.S. Territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other U.S. Territories and possessions. For basis of dollar values, see general note, p. 887.

No. 1027.—Imports and Exports of Alaska: 1882 to 1945 [In 1945 Alaska shipped domestic silver valued at \$3,121 to the United States]

# 32. Distribution and Services

## CENSUS OF BUSINESS

The primary source of data on distribution and services is the Census of Business. The first Census of Business covered the calendar year 1929. Although the next was scheduled by law to cover the year 1939, two special censuses covering the years 1933 and 1935 were taken before the regular 1939 census conducted as part of the 16th Census of the United States.

The business establishments covered in the distribution and service fields included in the Census of Business may be generally described as follows:

Retail trade.—Places of business primarly engaged in selling merchandise in a retail manner to personal and household consumers;

Wholesale trade.—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and,

Service.—Establishments engaged primarily in selling services as contrasted with merchandise as in the case of retail and wholesale trade.

In order that the coverage of distribution operations be complete, the censuses taken in 1929, 1935, and 1939 included information on the distribution of manufacturers' sales showing the proportion of manufacturers' output flowing through various distribution channels.

The most important differences in scope among the four Censuses of Business are to be found in the coverage of service enterprises. Service establishments were not included in the 1929 Census of Business at all. In 1933 the Census of Business was expanded to include certain service enterprises. These can be broadly classified into the following five major groups: (1) personal services, such as barber shops, laundries, etc., (2) selected business services, (3) repair services, (4) places of amusement, and (5) hotels. The 1935 Business Census added a number of important services among which were banking and finance, motor transportation, real estate agencies, ware-housing, insurance, and radio broadcasting. In 1939, banking and finance, motor transportation, insurance, and radio broadcasting were again dropped along with a number of minor types of service business.

In addition to observing the changes in the coverage of service establishments from census to census, it is important to take cognizance of the kind of services, broadly defined, not included in any Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government operated enterprises. In the past, these types of economic activity have been omitted largely because of problems in obtaining information or because reasonably adequate data were already available from other sources.

In many of the following tables data from the various Censuses of Business are compared. Adjustments have been made in the figures to make allowances for the changes in scope among the various years compared.

### **CURRENT STATISTICS**

Wholesale trade.—Monthly statistics on wholesalers' sales, inventories, and credits are compiled and published by the Bureau of the Census. These data are compiled on a sampling basis, covering 2,500 to 3,000 firms. Using these survey data as a basis, monthly estimates of aggregate sales of wholesalers raised to national totals are prepared by the Bureau of Foreign and Domestic Commerce and published in the Survey of Current Business.

Financial statistics relating to corporations in wholesale trade are available from the annual reports, Statistics of Income, published by the Bureau of Internal Revenue.

Current data on the production, movement, stocks, carry-over, receipts, and disappearances at principal markets, etc., for major agricultural commodities are available from the Production and Marketing Administration, Department of Agriculture.

As part of its investigations, the Federal Trade Commission has collected operating statistics on wholesalers as well as on the wholesale business of chains in various lines. Financial statistics on corporations engaged in wholesale trade whose securities are listed on the national security exchanges are available from the Securities and Exchange Commission.

Retail trade.—The Bureau of the Census compiles and publishes monthly statistics on sales of independent retail stores in 34 States, based on a sample of about 19,000 stores. The Bureau of Foreign and Domestic Commerce makes monthly estimates of the total sales of retail stores by kind of business groups and in addition makes monthly estimates of chain and mail-order sales. These estimates and related data on retail store sales are published currently in the Survey of Current Business.

Indexes of department store sales and stocks are compiled by the Board of Governors of the Federal Reserve System and by each of the 12 Federal Reserve Banks for its district. These indexes are published monthly in the Federal Reserve Bulletin and also in the Survey of Current Business. Monthly and annual statistics on consumer credit are compiled by the Board of Governors of the Federal Reserve System and published currently in the Federal Reserve Bulletin. Financial data for corporations engaged in retail trade and filing income tax returns are published by the Bureau of Internal Revenue in its annual report, Statistics of Income. Financial statistics on corporations engaged in retail trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

Service trades.—Typical of the numerous current statistical reports on personal and business services compiled by private agencies are the Horwath Hotel Accountant, Printers Ink, and National Advertising Records. Financial statistics of service businesses derived from corporation income tax returns are compiled and published annually by the Bureau of Internal Revenue in its annual report, Statistics of Income. Current data on service trades are provided by the Bureau of Foreign and Domestic Commerce in its quarterly and annual estimates of consumption expenditures published in the Survey of Current Business.

For additional or related data on distribution and service trades other than those included in this section, consult the index.

Data in this section relate to continental United States.

No. 1035.—Manufacturers' Sales—Distribution, by Primary Channels, by Industry Groups: 1929, 1935, and 1939

[No data are included for following classes of industries: (1) Those in which no sales were made, plants being maintained for purpose of making repairs; (2) those in which plants were engaged primarily in performing labor on materials owned by others so that their sales represented sales of services rather than commodities. This table is limited to industries for which 1929, 1935, and 1939 figures are directly comparable, whereas table 1939 covers all industries for which 1939 figures are available. For comparative purposes, data covering direct experi are excluded]

Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 1043, 1046, at Data for these concerns were received too late for inclusion in summary tables for 1929.
 Much of increase in sales of filling stations from 1929 to 1939 results from change in classification. (primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and in filling station category in 1939 Census of Retail Trade.

Figures for 1935 revised to exclude service garages; data to adjust 1929 figures not available.
 Represents, in addition to chain data shown in tables 1047 and 1048, data for multiunit organizations with 4 or more retail units, such as public utility stores, State liquor stores, direct selling (house-to-house), and other lesser

<sup>\*</sup>Not strictly comparable with previous years; a schedule form provided for reporting warehouse operations for 1939 resulted in the receipt of a greater number of separate reports.

\* Data not available.

\* Includes estimates for a small number of warehouses for which billings were not reported.

Source of tables 1044 and 1045: Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. I, Retail Trade, Part 3, for table 1044; Part I, for table 1045.

# No. 1046.—RETAIL TRADE—SUMMARY, BY STATES: 1929, 1935, AND 1939

[Data for 1929 and 1935 revised to exclude service garages and other automotive service businesses whose receipts from service sales exceeded their sales of merchandise. These are included in the Census of Service Establishments for 1930]

# No. 1051.—Sales of New Passenger Automobiles—Indexes of Dollar Sales Adjusted for Seasonal Variations: 1929 to 1941

[Represents consumer outlay on new passenger antimobiles relative to base-period 1935-39. Based on actual number of new cars sold by dealers each month, converted to a dollar basis by application of an estimated average price per cer. Number of cars sold was reported each month to Automobile Manufacturers' Association and represented 95 percent of all dealers' sales. Series discontinued for the duration of the war will be resumed when additional data become available]

[Daily average basis, 1935-39==100]

Source: Department of Commerce, Bureau of the Census; Census of Business, 1930, Vol. III. Service Businesss

<sup>1</sup> Employees and pay roll include paid executives of corporations but not number and compensation of propristors of unincorporated businesses.

2 Statistics for 1935, adjusted for comparison, are as follows: Number of establishments, 631,309; receipts \$3,000,6000. The adjustment was made by revising the original 1935 figures to include certain kinds of business that were not included in the Service Census but were published in other census reports and by excluding others which were within the scope of the 1935 census but were omitted from the 1939 census. For a comparison of the two items by industries, see source.

3 For figures for earlier years, see table 1055, p. 966.

4 Includes manufacturing plants with products valued at less than \$5,000 and therefore not covered by the Census of Manufactures.

## No. 1054.—Service Establishments—Summary, by States: 1939

[The census of service establishments covers a heterogeneous group of establishments (see table 1053) engaged primarily in the sale of service, as distinguished from establishments dealing in merchandise. The professional field, the financial, educational, transportation, construction, and diverse other fields of business activity, many of which are covered elsewhere, are not included. Owing to differences in the scope of the 1935 and 1939 censuses of service establishments, the aggregates for 1939 are not comparable with those for 1935 as published in the 1937-40 issues of the Abstract]

No. 1055.—Power Laundries, Cleaning and Dyeing Establishments, and Rig CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1939

[All mency figures in thousands of dellars. Statistics cover establishments reporting receipts of \$5,000 or mere except for 1939 figures in italics, which represent establishments reporting receipts of \$100 or more. The Census of Business for 1939 classified the establishments shown in this table as service establishments and covered those reporting receipts of \$100 or more. See also table 1033 for statistics for 1939. Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in geomia as an activity of the power laundry industry for 1929 and earlier years]

# No. 1056.—Hotels—Summary, 1929 to 1939, and by Size, 1939

[The census coverage of hotels is restricted, in the main, to establishments which are designated as hotels and which provide hotel accommodations as their major business activity. For 1835 and 1839, the can was was limited to hotels having at least 6 guest rooms or having receipts from room rentals amounting to at least \$500 for a full year's operations. Because of differences in coverage for 1929, 1933, 1935, and 1939, comparable data are available only for year-round hotels having 25 or more guest rooms

Not available.
 Includes closures of all kinds and not simply business failures.

## APPENDIX

## UNITED STATES UNITS WITH METRIC EQUIVALENTS

1 inch = 2.540 centimeters.
1 foot = 0.3048 meter. 1 yard = 0.9144 meter. 1 mile = 1.609 kilometers 1 square yard = 0.8361 square meter. 1 acre=0.4047 hectare. 1 square mile = 2.590 square kilometers. 1 cubic inch = 16.39 cubic centimeters. 1 cubic foot = 0.02832 cubic meter. 1 cubic vard = 0.7646 cubic meter.

1 liquid quart=0.9463 liter. 1 gallon=221 cubic inches=3.785 liters. 1 bushel (measured)=2,150.4 cubic inches=35.24 liters. 1 avoirdupois ounce=28.35 grams.

1 troy ounce=31.10 grams. 1 pound=0.4686 kilogram. 1 long ton=2,240 pounds=1.0160 metric tons of 1,000 kilograms.

1 short ton = 2,000 pounds=0,9072 metric ton.

## UNITED STATES GALLON AND BUSHEL WITH BRITISH EQUIVALENTS

1 United States gallon=231 cubic inches=0.8331 imperial gallon.

1 United States bushel=2,150.4 cubic inches=0.9894 imperial bushel.

## APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT C	F UNITED GALLON	WEIGHT OF BARREL OF 48 GALLONS		
	Pounds	Kilo- grams	Pounds	Kilo- grams	
Crude petroleum Lubricating oils Illuminating oils (kerosene) Gasoline and related products (motor spirit, benzine, etc.) Fuel and gas oils	7. 3 7. 0 6. 6 6. 1 7. 7	3, 311 3, 175 2, 994 2, 767 3, 493	306. 6 294. 0 277. 2 256. 2 323. 4	139 07 133, 36 125, 74 116, 21 146, 69

# BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. One-time studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right hand side of each page indicate that data from the report cited appear in the Statistical Abstract. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the Abstract.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population. are referred to by name rather than by specific volume references under the various topic headings. The final reports of the Sixteenth Census, which include those on the Censuses of Agriculture, Business, Manufactures, Mineral Industries, Population, and Housing, are listed at the end of the bibliography.

#### SIXTEENTH DECENNIAL CENSUS OF THE UNITED STATES

## LIST OF FINAL REPORTS

[Each part of a volume in this list is a separate book or pamphlet. Preliminary bulletins, which were issued in advance of final reports, are not included in the list. A detailed catalog of 16th Decennial Census publications is available upon request.]

#### Agriculture

- Vol. I: Farms and Farm Property, With Related Information for Farms and Farm Operators, Livestock and Livestock Products, and Crops Statistics for Counties (6 parts).
  - Part 1. New England, Middle Atlantic, and East North Central States.
  - Part 2. West North Central States.
  - Part 3. South Atlantic States.
  - Part 4. East South Central States.
  - Part 5. West South Central States.
  - Part 6. Mountain and Pacific States.
- Vol. II: Value of Farm Products; Farms Classified by Major Source of Income; Farms Classified by Value of Products, Statistics for Counties (3 parts).
  - Part 1. The Northern States.
  - Part 2. The Southern States.
  - Part 3. The Western States.
- Vol. III: General Report. Statistics by Subjects.

Territories and Possessions.

Irrigation of Agricultural Lands.

Drainage of Agricultural Lands.

Other Reports:

Special Poultry Report.

Special Cotton Report.

Cross-line Acreage.

Cows Milked and Dairy Products.

Drainage of Alluvial Lands.

Tabular and Graphic Presentation of Specified Irrigation Census Statistics.

Abandoned or Idle Farms.

Handbook—Census of Agriculture: 1940.

Ranking Agricultural Counties.

Analysis of Specified Farm Characteristics for Farms Chassified by Total Value of Products (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and the Bureau of Agricultural Economics and the Farm Security Administration of the U. S. Department of Agricultural:

Crop-Sharing Contracts.

Cash Rent (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and the Bureau of Agricultural Economics, U. S. Department of Agriculture).

Value of Farm Products by Color and Tenure of Farm Operator.

#### **Business**

- Vol. I: Retail Trade: 1939 (3 parts).
  - Part 1. United States Summaries and General Analyses.
  - Part 2. Commodity Sales and Analysis by Sales Size.
  - Part 3. Kinds of Business by Areas, States, Counties, and Cities.

#### Business—Continued.

Vol. II: Wholesale Trade: 1939.

Vol. III: Service Establishments; Places of Amusement; Hotels; Tourist Courts and Tourist Camps—1939.

Vol. IV: Construction: 1939.

Vol. V: Distribution of Manufacturers' Sales: 1939.

### Geography.

Areas of the United States: 1940.

Unincorporated Communities by States, United States.

#### Manufactures.

Vol. I: Statistics by Subjects.

Vol. II: Reports by Industries (2 parts).

Part 1. Groups 1-10.

Part 2. Groups 11-20.

Vol. III: Reports for States and Outlying Areas.

### Other Reports:

Man-Hour Statistics for 171 Selected Industries (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and Bureau of Labor Statistics, U. S. Department of Labor).

Changes in the Distribution of Manufacturing Wage Earners 1899-1939 (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and Bureau of Agricultural Economics, U. S. Department of Agriculture).

#### Mineral Industries.

Vol. I: General Summary and Industry Statistics.

Vol. II: State and County Statistics.

## Population.

Vol. I: Number of Inhabitants.

Vol. II: Characteristics of the Population (7 parts).

Part 1. U. S. Summary, Alabama-District of Columbia.

Part 2. Florida-Iowa.

Part 3. Kansas-Michigan.

Part 4. Minnesota-New Mexico.

Part 5. New York-Oregon.

Part 6. Pennsylvania-Texas.

Part 7. Utah-Wyoming.

Vol. III: The Labor Force (5 parts).

Part 1. United States Summary.

Part 2. Alabama-Indiana.

Part 3. Iowa-Montana.

Part 4. Nebraska-Oregon.

Part 5. Pennsylvania-Wyoming.

Vol. IV: Characteristics by Age (4 parts).

Part 1. U. S. Summarv.

Part 2. Alabama-Louisiana.

Part 3. Maine-North Dakota.

Part 4. Ohio-Wyoming.

## Other reports:

Educational Attainment of Children by Rental Value of Home.

Institutional Population 14 Years Old and Over.

Comparative Occupation Statistics for the United States, 1870-1940.

Estimates of Labor Force, Employment, and Unemployment in the U. S., 1940 and 1930.

Characteristics of the Nonwhite Population by Race.

## Population—Continued.

Other reports-Continued.

Internal Migration, 1935 to 1940.

Age of Migrants.

Color and Sex of Migrants.

Economic Characteristics of Migrants.

Social Characteristics of Migrants.

State of Birth of the Native Population.

Nativity and Parentage of the White Population.

General Characteristics.

Country of Origin of Foreign Stock.

Mother Tongue.

Differential Fertility, 1940 and 1910.

Fertility for States and Large Cities.

Standardized Fertility Rates and Reproduction Rates.

Women by Number of Children Under 5 Years Old.

Women by Number of Children Ever Born.

The Labor Force (Sample Statistics).

Wage or Salary Income in 1939.

Employment and Personal Characteristics.

Education, Occupation, and Household Relationship of Males 18 to 44 Years Old (prepared in cooperation with the Special Service Division of the Was Department).

Characteristics of Persons Not in the Labor Force.

Usual Occupation.

Industrial Characteristics.

Occupational Characteristics.

Employment and Family Characteristics of Women.

Families (Including Housing Data).

General Characteristics.

Types of Families.

Employment Status.

Family Wage or Salary Income in 1939.

Tenure and Rent.

Income and Rent.

Characteristics of Rural Farm Families.

Size of Family and Age of Head.

#### Housing.

Vol. I: Data for Small Areas (2 parts).

Part 1. U. S. Summary and Alabama-Nebraska.

Part 2. Nevada-Wyoming.

Supplement: Block Statistics for Cities.

Vol. II: General Characteristics (5 parts).

Part 1. U. S. Summary.

Part 2. Alabama-Indiana.

Part 3. Iowa-Montana.

Part 4. Nebraska-Pennsylvania.

Part 5. Rhode Island-Wyoming.

Vol. III: Characteristics by Monthly Rent or Value (3 parts).

Part 1. U. S. Summary.

Part 2. Alabama-New Hampshire.

Part 3. New Jersey-Wyoming.

Housing-Continued.

Vol. IV: Mortgages on Owner-Occupied Nonfarm Homes (3 parts).

Part 1. U. S. Summary.

Part 2. Alabama-New York,

Part 3. North Carolina-Wyoming and Supplements—A. Homes Built in 1935—40 and B. Homes Occupied by Nonwhite Owners.
